2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be

traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances. Exam board experts raised concerns at the time but these were not acted upon by the regulator. The then interim Ofqual. Further difficulties arose because of pressures from the school accountability system. The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding. The current status of Ofqual as an independent regulator accountable to Parliament is the right one. However, the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place. The Committee is also concerned that there is a rush towards separate exam systems for England, Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do.

The Corporatization of the Business School Tony Huzzard, Mats Benner, Dan Kärreman, 2017-04-21

With business schools becoming increasingly market driven, questionable trends have emerged such as the conflation of academic and corporate management and the notion that academics and students are market players who respond rationally to market signals. Using individual studies from leading scholars in a variety of disciplines and countries, this book identifies the global pressures behind these trends. It focuses on the debates surrounding the commercialization of business schools and the rise of different methods of measuring their success. In their unique approach, the authors and editors discuss the impact of the confrontation between the timeless values embodied by Minerva, the Roman goddess of Wisdom, and the hard realities of competition and corporatization in modern society. This book will be compelling reading for students and academics in critical management studies, organizational studies, public management and higher education, as well as for stakeholders in academia and educational policy.

Global Innovation and Economic Value Vijay Kumar, R. P. Sundarraj, 2018-01-28

This book attempts to capture innovation outcomes. The intent is on a holistic assessment of value creation by innovation: the societal value that it delivers to humanity, the economic value that it has the potential to endow to nations, and the monetary value that it provides to innovating firms. With a range of anecdotal examples and empirical analysis, the book endeavours to answer the question: Have investments in innovation paid off? Big data and analytics underpin the development of the book material. The coverage is truly global, accentuating the economic value created by innovation in the technology and pharmaceutical sectors, the two largest bastions of innovation. In addition, it includes numerous examples of successful innovation in global companies while analyzing its economic financial impact.
