STUDY OF THEODOLITE IN DETAIL – PRACTICE FOR MEASUREMENT OF HORIZONTAL AND VERTICAL ANGLES

The theodolite is one of the most precise surveying instruments and is suitable for measurement of angles in horizontal as well as vertical planes.

PARTS OF VERNIER THEODOLITE

- 1) **THE LEVELING HEAD:** this usually consists of a tribrach and triivet carrying one foot screw on each of its three arms.
- 2) **THE TWO SPINDLES:** The theodolite has an outer axis and an inner axis of rotation which are both coincident with the vertical axis of the instruments.
- 3) **THE LOWER PLATE AND UPPER PLATE:** the outer axis is attached to the lower plate which is also called the scale plate. This plate is circular in shape and beveled at the edge. It is graduated from 00 to 3600 in the clock wise direction. The inner axis is attached to the upper plate which is also known as the vernier plate. The upper clamp and upper tangent screw facilitate fixing it to the lower plate at any desired position.
- 4) **PLATE LEVEL TUBES:** two level tubes are provided on the vernier plate at right angles to one another. These are known as Plate level.

Landmark Essays on Writing Across the Curriculum Charles Bazerman, David Russell, 2020-11-25 Rhetoric as a general teaching while preaching locality of action and guidelines for handling that locality has tended from the beginning to serve as a universality It has offered a generalized techne with only limited categories appropriate for all discursive situations at least for those that were not excluded from the realm of rhetoric Nonetheless from its beginnings rhetoric limited its interests to certain activity fields such as law government religion and most important the educators of leaders in these activity fields This collection presents landmarks showing where the Writing Across the Curriculum WAC and Writing in the Disciplines WID movements have gone They have opened up a number of prospects that were impossible to see when rhetoric and composition confined their gaze to relatively few discursive activities This suggests that the rhetorical landscape is becoming more complex and interesting as well as more responsive to life in the complex differentiated societies that have emerged in the last few centuries This volume will reveal to scholars and researchers a range of possibilities for the study of disciplinary discourse and its teaching and suggest to them new prospects for the future and for the better

Dollar Data: Building Confidence - Vol.1 Stephen DeMeo, 2020-07-31 Global warming our current and greatest challenge is without precedent Among the many consequences that are impacting our society one unanticipated concern involves scientific truth When the President of the United States and others in his administration declare that global warming is fake science it calls into question what real science is and what real school science should be I will argue that real science is quality science one that is based on the rigorous collection of reliable and valid data To collect quality data requires bending over backwards to get things right and this is exactly what makes science so special Truth is made when scientists go this extra yard and devise controlled experiments collect large data sets confirm the data and rationally analyze their results Making scientific truth sounds difficult to do in the science laboratory but in reality there are many straightforward ways that

truth can be constructed In the first of two volumes I discuss twelve such ways I call them Confidence Indicators that can allow students to strongly believe in their data and their subsequent results Many of these methods are intuitive and can be used by young students on the late elementary level all the way up to those taking introductory college science courses As in life science is not without doubt In the second volume I introduce the concept of scientific uncertainty and the indicators used to calculate its magnitude I will show that science is about connecting confidence with uncertainty in a specific manner what I refer to as the Confidence Uncertainty Continuum expression This important relationship epitomizes the scientific enterprise as a search for probabilistic rather than absolute truth This two volume set will contain a variety of ways that data quality can be instituted into a science curriculum To support its use many of the examples that I will present involve science teachers as well as student work and feedback from different grade levels and in different scientific disciplines Specific chapters will be devoted to reviewing the academic literature on data quality as well as describing my own personal research on this important but often neglected topic

Just in Time Teaching Scott Simkins,Mark Maier,2023-07-03 Just in Time Teaching JiTT is a pedagogical approach that requires students to answer questions related to an upcoming class a few hours beforehand using an online course management system While the phrase just in time may evoke shades of slap dash work and cut corners JiTT pedagogy is just the opposite It helps students to view learning as a process that takes time introspection and persistence Students who experience JiTT come to class better prepared and report that it helps to focus and organize their out of class studying Their responses to JiTT questions make gaps in their learning visible to the teacher prior to class enabling him or her to address learning gaps while the material is still fresh in students minds hence the label just in time JiTT questions differ from traditional homework problems in being designed not only to build cognitive skills but also to help students confront misconceptions make connections to previous knowledge and develop metacognitive thinking practices Students consequently spend more time on course concepts and ideas but also read their textbooks in ways that result in more effective and deeper learning Starting the class with students work also dramatically changes the classroom learning environment creating greater student engagement This book demonstrates that JiTT has broad appeal across the academy Part I provides a broad overview of JiTT introducing the pedagogy and exploring various dimensions of its use without regard to discipline Part II of the book demonstrates JiTT s remarkable cross disciplinary impact with examples of applications in physics biology the geosciences economics history and the humanities Just in Time Teaching article from The Hispanic Outlook in Higher EducationReprinted with permission from Hispanic Outlook in Higher Education Magazine www.hispanicoutlook.com
