Erkkilä,2013-09-26 Global University Rankings explores the novel topic of global university rankings and their effects on higher education in Europe The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies disciplinary traditions and higher education institutions The first global university rankings were published less than a decade ago but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education The rankings have portrayed European academic institutions in a varying light There is intense reflexivity over the figures leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe *University Rankings, Diversity, and the New Landscape of Higher Education* ,2019-02-18 University rankings are a relatively new phenomenon in higher education Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear rankings attempting to measure university performance beyond national borders No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world This book is written as part of the effort to better understand rankings and their effects on higher education A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector **How to Write a Winning UCAS Personal Statement** Ian Stannard,2016-05-20 The personal statement is a pivotal part of your UCAS

application and the section that applicants agonise over the most Admissions tutors will see hundreds of personal statements for one course alone so how can you make yours stand out from the crowd Uniquely written in direct collaboration with universities this bestselling guide provides current and accurate insider information on what admissions tutors are really looking for Helping you to make informed choices and positive applications it is packed full of vital tips on How to tailor the perfect personal statement for your chosen course with a collection of subject specific chapters The best way to showcase your skills Which classic mistakes you MUST avoid What an ideal personal statement looks like and how to write one Fully updated to reflect the latest admissions procedures this is a must read for anyone wanting to write a winning UCAS personal statement and land a place on their dream course
