The Report: Papua New Guinea 2015 Oxford Business Group, 2016-09-17 In Papua New Guinea hopes are high that real change is on its way the country s political administrative financial and technical leaders now have to find a way to ensure the most productive distribution and use of

financial resources Many international actors are watching closely to see how this young country negotiates its path Papua New Guinea became a major exporter of gas in 2014 when the 19bn PNG liquefied natural gas LNG project was completed ahead of schedule and within budget significantly increasing the size and strength of the economy The year ahead is likely to see PNG benefit from the further development of its hydrocarbons sector fuelling the growth of its economy as a whole The LNG influx also poses challenges however in terms of ensuring inclusive growth and productive use of the new revenues PNG takes pride in being a final frontier of natural and cultural development but the task ahead is to protect the country's heritage while becoming part of the global economy

Mathematics Education in a Neocolonial Country: The Case of Papua New Guinea Patricia Paraide, Kay Owens, Charly Muke, Philip Clarkson, Christopher Owens, 2023-01-10 Most education research is undertaken in western developed countries While some research from developing countries does make it into research journals from time to time but these articles only emphasize the rarity of research in developing countries The proposed book is unique in that it will cover education in Papua New Guinea over the millennia Papua New Guinea's multicultural society with relatively recent contact with Europe and the Middle East provides a cameo of the development of education in a country with both a colonial history and a coup less transition to independence Discussion will focus on specific areas of mathematics education that have been impacted by policies research circumstances and other influences with particular emphasis on pressures on education in the last one and half centuries This volume will be one of the few records of this kind in the education research literature as an in depth record and critique of how school mathematics has been grown in Papua New Guinea from the late 1800s and should be a useful addition to graduate programs mathematics education courses history of mathematics as well as the interdisciplinary fields of cross cultural studies scholarship focusing on globalization and post decolonialism linguistics educational administration and policy technology education teacher education and gender studies

History of Number Kay Owens, Glen Lean, Patricia Paraide, Charly Muke, 2017-10-24 This unique volume presents an ecocultural and embodied perspective on understanding numbers and their history in indigenous communities The book focuses on research carried out in Papua New Guinea and Oceania and will help educators understand humanity's use of numbers and their development and change The authors focus on indigenous mathematics education in the early years and shine light on the unique processes and number systems of non European styled cultural classrooms This new perspective for mathematics education challenges educators who have not heard about the history of number outside of Western traditions and can help them develop a rich cultural competence in their own practice and a new vision of foundational number concepts such as large numbers groups and systems Featured in this invaluable resource are some data and analyses that chief researcher Glendon Angove Lean collected while living in Papua New Guinea before his death in 1995 Among the topics covered The diversity of counting system cycles where they were established and how they may have developed A detailed exploration of number systems other than base 10 systems including 2 cycle 5 cycle 4 and 6 cycle

systems and body part tally systems Research collected from major studies such as Geoff Smith's and Sue Holzknecht's studies of Morobe Province's multiple counting systems Charly Muke's study of counting in the Wahgi Valley in the Jiwaka Province and Patricia Paraide's documentation of the number and measurement knowledge of her Tolai community The implications of viewing early numeracy in the light of this book's research and ways of catering to diversity in mathematics education In this volume Kay Owens draws on recent research from diverse fields such as linguistics and archaeology to present their exegesis on the history of number reaching back ten thousand years ago Researchers and educators interested in the history of mathematical sciences will find *History of Number Evidence from Papua New Guinea and Oceania* to be an invaluable resource

Reflective Teaching Beliefs and Practices of Secondary Agricultural Educators in Papua New Guinea Arnold Charles Parapi, 2000

Anti-Corruption and its Discontents Grant W. Walton, 2017-08-03

The fight against corruption is now a core part of development policy and practice Some call these efforts a war on corruption What does this so called war mean for developing countries And how do international perspectives on corruption relate to local and national concerns This book examines the relevance of anti corruption discourse in Papua New Guinea PNG one of the most culturally rich and corrupt countries on earth Despite increased international national and local efforts to address corruption over the past two decades many fear that levels of corruption continue to rise largely unabated Some believe that the mismatch between international national and local assumptions regarding the nature of corruption and how it should be addressed is at the heart of the issue International anti corruption initiatives stress zero tolerance and try to strengthen formal state based institutions However many people in PNG are more concerned about maintaining social relationships than following state laws and rules This book critically examines the implications of the anti corruption agenda and the collision of international national and local perspectives In doing so it provides a diagnostic on international assumptions about corruption and how it should be fought in developing countries offering surprising and important lessons This book is essential reading for scholars and students of Development Studies Geography Political Studies and Economics as well as practitioners and policy makers working in development

Going to School in Oceania Craig Campbell, Geoffrey Sherington, 2007-10-30 The history and current practices for school systems in the countries of the Oceanic region depend on the economic political and cultural circumstances of their countries Divided into four chronological sections pre nineteenth century nineteenth century twentieth century and present times each chapter traces the factors that have impacted educational philosophy and goals for each country Identifying available options for students of all economic backgrounds each chapter also includes a Day in the Life feature that shares with readers what a typical student in

that country will experience at their school Australia Fiji New Zealand Papua New Guinea Samoa **Contemporary PNG Studies** ,2004 Contemporary PNG studies publishes research findings personal perspectives reports of projects or developments and reviews of recent books on Papua New Guinea **Uneven Connections** Robert J. Foster,2024-03-28 In the first years of the 21st century economic liberalisation began to transform telecommunications services throughout the Pacific Islands Government regulators corporate executives and everyday consumers hopefully imagined that opening mobile phone markets to competition would result in greater access lower costs and accelerated development Uneven Connections examines the ways in which liberalisation took hold in Papua New Guinea PNG when a unit of the Caribbean based mobile network operator Digicel Group Ltd seized the opportunity to compete with the state sponsored incumbent The book highlights how mobile phones entered the lives of urban and rural Papua New Guineans after Digicel's arrival in 2007 In so doing it describes a moral economy in which companies consumers and state agents continually negotiate who owes what to whom In what ways have these various actors invented and negotiated new forms of both freedom and constraint Uneven Connections advances understanding of how a so called digital revolution in PNG unfolded resulting in outcomes that often confounded the expectations of policy makers and ordinary citizens alike It assesses the extent to which some of the promises of this revolution have been redeemed and identifies the challenges faced by companies consumers and state agents in establishing and experiencing novel forms of uneven connectivity The book provides a short and selective history of mobile phones in PNG ending with the sale of Digicel's Pacific operations to the Australian company Telstra in 2022

Mathematics And Its Teaching In The Asia-Pacific Region John M Mack,Bruce R Vogeli,2018-08-24 This book provides the global mathematics education community with information on the recent and current status of the teaching of mathematics in a group of island nations in the Asia Pacific region Sri Lanka Indonesia Japan the Philippines Australia Papua New Guinea New Zealand and twelve nations in the South Pacific Ocean It is the third volume in a series conceived by Dr Bruce Vogeli of Columbia University Teachers College and published by WSP aimed at producing contemporary accounts of mathematics teaching in a world wide group of nations Previous volumes have covered Central and South American nations and a selection of Muslim nations respectively **The Statesman's Yearbook 2006** B. Turner,2017-02-07 For one hundred and forty two years The Statesman's Yearbook has been relied upon to provide accurate and comprehensive information on the current political economic and social status of every country in the world The 2006 edition is fully updated and contains more information than ever before A foldout colour section provides a political world map and flags for the one hundred and ninety two countries of the world In an endlessly changing world the annual publication of The Statesman's Yearbook gives you all of the information you need in one easily digestible single volume It will save hours of research and cross referencing between different sources and it is an essential annual purchase **Pacific Magazine** ,2003 The Progressive Education Fallacy in Developing Countries Gerard Guthrie,2011-06-23 This book provides a provocative but carefully argued addition to

the theory and practice of education in developing countries The book provides an ethical and empirical justification for support of formalistic teaching in primary and secondary schools in developing countries It also refutes the application of progressive education principles to curriculum and pre and in service teacher education in such contexts The central focus of this book is the formalistic teaching prevalent in the classrooms of many developing countries Formalistic teacher centred traditional didactic pedagogic teaching is appropriate in the many countries with revelatory epistemologies unpopular and old fashioned though these methods may seem in some western especially Anglophone ones Formalism has been the object of many failed progressive curriculum and teacher education reforms in developing countries for some 50 years *Annual Report. Visuospatial Reasoning Kay Owens,2014-11-07 This book develops the theoretical perspective on visuospatial reasoning in ecocultural contexts granting insights on how the language gestures and representations of different cultures reflect visuospatial reasoning in context For a number of years two themes in the field of mathematics education have run parallel with each other with only a passing acquaintance These two areas are the psychological perspective on visuospatial reasoning and ecocultural perspectives on mathematics education This volume examines both areas of research and explores the intersection of these powerful ideas In addition there has been a growing interest in sociocultural aspects of education and in particular that of Indigenous education in the field of mathematics education There has not however been a sound analysis of how environmental and cultural contexts impact visuospatial reasoning although it was noted as far back as the 1980s when Alan Bishop developed his duality of visual processing and interpreting visual information This book provides this analysis and in so doing not only articulates new and worthwhile lines of research but also uncovers and makes real a variety of useful professional approaches in teaching school mathematics With a renewed interest in visuospatial reasoning in the mathematics education community this volume is extremely timely and adds significantly to current literature on the topic
