Magidimisha-Chipungu, Lovemore Chipungu, 2021-09-28 This book s point of departure rests on the premises that dimensions of the mainstream inclusive city discourse fail to capture in detail vulnerable clusters of society being women children and the aging the minority clusters i e the blind the disabled and migrants In addition it fails to recognize the increase of spatial inequality driven by racial and class differences a factor that has seen an increase in community violence and protests The focus on spatial inequality has for a long time blind folded urban authorities to ignore exclusion arising out of the same environments created with a notion of creating inclusivity Hence this book collapses spatial walls as it seeks to uncover the true perspectives of inclusivity in cities beyond spatial dimensions but within social realms The depth of this book s enquiry

rests on its critical investigation of Southern African cities through historical epochs of apartheid and colonialism in the region

Extractive Industries and Changing State Dynamics in Africa Jon Schubert,Ulf Engel,Elisio Macamo,2018-07-04 This book uses extractive industry projects in Africa to explore how political authority and the nation state are reconfigured at the intersection of national political contestations and global transnational capital Instead of focusing on technological zones and the new social assemblages at the actual sites of construction or mineral extraction the authors use extractive industry projects as a topical lens to investigate contemporary processes of state making at the state corporation nexus Throughout the book the authors seek to understand how public political actors and private actors of liberal capitalism negotiate and redefine notions and practices of sovereignty by setting legal regulatory and fiscal standards Rather than looking at resource governance from a normative perspective the authors look at how these negotiations are shaped by and reshape the self conception of various national and transnational actors and how these jointly redefine the role of the state in managing these processes for the greater good Extractive Industries and Changing State Dynamics in Africa will be useful for researchers upper level students and policy makers who are interested in new articulations of state making and politics in Africa

Brysk, 2018-08-01 How can we understand and contest the global wave of violence against women In this book Alison Brysk shows that gender violence across countries tends to change as countries develop and liberalize but not in the ways that we might predict She shows how liberalizing authoritarian countries and transitional democracies may experience more shifting patterns and greater levels of violence than less developed and democratic countries due to changes and uncertainties in economic and political structures While a combination of international action law public policy civil society mobilization and changes in social values work to decrease gender violence Brysk assesses the potential limits and balance of these measures

Politics at a Distance from the State Lucien van der Walt, Kirk Helliker, 2022-08-23 For decades most anti capitalist and anti imperialist movements identified radical transformation with capturing state power The collapse of these statist projects from the 1970s led to a global crisis of left and working class politics But crisis has also opened space for rediscovering alternative society centered anti capitalist modes of bottom up change operating at a distance from the state These have registered important successes in practice such as the Zapatistas in Mexico and Rojava in Syria They have been a key influence on movements from Occupy in United States to the landless in Latin America to anti austerity struggles in Europe and Asia to urban movements in Africa Their lineages include anarchism syndicalism autonomist Marxism philosophers like Alain Badiou and radical popular praxis This path breaking volume recovers this understanding of social transformation long side lined but now resurgent like a seed in the soil that keeps breaking through and growing It provides case studies with reference to South Africa and Zimbabwe and includes a dossier of key texts from a century of anarchists syndicalists insurgent unionists and anti apartheid activists in South Africa Originating in an African summit of radical academics struggle veterans and social movements the book includes a preface from John Holloway

Debating African Philosophy George Hull, 2018-11-21 In African countries there has been a surge of intellectual interest in foregrounding ideas and thinkers of African origin in philosophy as in other disciplines that have been unjustly ignored or marginalized African scholars have demonstrated that precolonial African cultures generated ideas and arguments which were at once truly philosophical and distinctively African and several contemporary African thinkers are now established figures in the philosophical mainstream Yet despite the universality of its themes relevant contributions from African philosophy have rarely permeated global philosophical debates Critical intellectual excavation has also tended to prioritize precolonial thought overlooking more recent sources of home grown philosophical thinking such as Africa's intellectually rich liberation movements This book demonstrates the potential for constructive interchange between currents of thought from African philosophy and other intellectual currents within philosophy Chapters authored by leading and emerging scholars recover philosophical thinkers and currents of ideas within Africa and about Africa bringing them into dialogue with contemporary mainstream philosophy foreground the relevance of African theorizing to contemporary debates in epistemology philosophy of language moral political philosophy philosophy of race environmental ethics and the metaphysics of disability make new interventions within on going debates in African philosophy consider ways in which philosophy can become epistemically inclusive interrogating the contemporary call for decolonization of philosophy Showing how foregrounding Africa its ideas thinkers and problems can help with the project of renewing and improving the discipline of philosophy worldwide this book will stimulate and challenge everyone with an

interest in philosophy and is essential reading for upper level undergraduate students postgraduate students and scholars of African and Africana philosophy
