The Strange Loops of Translation Douglas Robinson, 2021-12-16 One of the most exciting

theories to emerge from cognitive science research over the past few decades has been Douglas Hofstadter's notion of strange loops from G del Escher Bach 1979 Hofstadter is also an active literary translator who has written about translation perhaps most notably in his 1997 book *Le Ton Beau de Marot* where he draws on his cognitive science research And yet he has never considered the possibility that translation might itself be a strange loop In this book Douglas Robinson puts Hofstadter's strange loops theory into dialogue with a series of definitive theories of translation in the process showing just how cognitively and affectively complex an activity translation actually is

[A Scientific Bibliography of the Waterberg, Makgabeng Plateau, Blouberg and Soutpansberg](#) Rodney Moffet, 2025-06-16 The Scientific Bibliography of the Waterberg Makgabeng Plateau Blouberg and Soutpansberg follows two similar bibliographies of other mountain areas of South Africa This bibliography is particularly relevant as it covers many disciplines in two recently declared Biosphere Reserves by UNESCO namely Waterberg and Vumbie

[Echoes of Africa's Past. Archaeological explorations in the Anthropocene](#) Savino di Lernia, 2025-05-30 Marking the 70th anniversary of the Libyan Italian archaeological Mission in the Tadrart Acacus and Messak this volume offers a multidisciplinary reflection on Africa's deep past and its enduring legacies in the Anthropocene By tracing the echoes of human environment interactions across time it highlights how archaeological research continues to reshape our understanding of adaptation resilience and transformation in African societies Drawing on interdisciplinary approaches including palaeoecology bioarchaeology rock art analysis the archaeology of food production and their various connections and networks this book challenges outdated Eurocentric narratives by foregrounding African agency and complexity Key themes include among others the Holocene environmental changes that influenced settlement patterns the significance of rock art in interpreting past belief systems and the impact of colonial trade and imperial expansion on indigenous communities *Echoes of Africa's Past* serves as a resource for archaeologists historians anthropologists and heritage scholars offering fresh perspectives on Africa's dynamic past and its relevance to debates on sustainability and cultural heritage in the Anthropocene Archaeological knowledge is incremental and hard won It is assembled through time intensive study of fragmentary evidence and its corpus represents intergenerational effort Though sometimes based on the study of stones our interpretations are not written in them Our working hypotheses typically run ahead of the evidence needed to assess them Expanded investigations new methods and changing premises compel revision and sometimes outright rejection of earlier ideas Typological aids deemed useful by earlier generations may outlive their usefulness at the same time as the evidence they organize remains pertinent and available for rethinking The cumulative character of archaeological knowledge enables scalar perspectives across space and through time casting what we know of one location in relief through comparison to others These revisions rethinking and scalar reflections encourage us to appreciate the complexity and diversity of past contexts as amply illustrated in contributions to this volume In short resuscitating echoes of Anthropocene Africa is painstaking work In this way and others archaeology is and should be slow
