Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the

transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience Development Practice in Eastern and Southern Africa Tshilidzi

Madzivhandila, Sepo Hachigonta, Joseph Francis, Joseph Kamuzhanje, Oluwatoyin Dare Kolawole, Shirley DeWolf, 2022-03-29

This book is a rare collection of reflective and reflexive stories that reveal how seasoned academics agents of grassroots social change leaders and journalists transformed and shaped the development landscape in eastern and southern Africa Whereas practical experiences are crucial assets and resources for shaping the academic environment and development practice landscape most of the existing literature recommended as key learning materials in tertiary institutions is rarely in synch with the practical realities of development practice The shared individual lived experiences from academic endeavours and fieldwork provide hands on tools for students and emerging practitioners who might be involved in or are currently facilitating development work The thrust of the book therefore is to demystify the day to day experiences of development practitioners while contributing to learning pathways or strategies for achieving viable solutions to the myriad of challenges which grassroots communities face The relevance of the book as a crucial resource for students pursuing development oriented degree programmes in colleges and universities is obvious Without any doubt the compilation will be handy in the implementation of diverse development oriented transformation agenda at academic programming and policy levels

Making a Life Hannah J Dawson, 2025-05 Making a Life explores the dynamic everyday life making strategies of young men in Zandspruit a sprawling informal settlement on the outskirts of Johannesburg In many ways Zandspruit typifies the precariousness of life within South Africa where two thirds of young people lack waged employment However rather than seeing Zandspruit as dumping ground Hannah Dawson calls for an integrated understanding of the complex linkages between people s lives and livelihoods and the multifaceted socio political landscape of urban settlements Based on 14 months of ethnographic research Dawson investigates how social belonging identity and economic realities intertwine in places such as Zandspruit This approach not only challenges conventional approaches to studying work it also questions the increasingly prevalent perspective that romanticises the adaptive survival strategies of the urban poor By exploring the intricate connections between those with and without wages the author shows how young men manage complex social political and economic conditions Making a Life offers insights into issues such as urban work citizenship under employment and inequality in South Africa At the same time it contributes to a global understanding of how young people men especially manage economic uncertainty **Apartheid and the Making of a Black Psychologist** N. There is little agreement today on what it takes to be intelligent Yet this word is widely believed to be about something real mostly biological and important From this popular perspective intelligence is also something you can have a lot of and luckily find yourself being labeled as a genius Or sadly something you do not have nearly enough of and so find yourself being seen by others at least behind your back as silly stupid or plainly idiotic Looked at closely however it turns out this word belongs more in the realm of traditional folklore than modern science COVID-19, Tourist Destinations and Prospects for Recovery

Toxic Belonging? Identity and Ecology in Southern Africa Dan Wylie, 2009-03-26
Southern Africa's literatures brim with references to the natural world its landscapes and its animals Both fictional and non-fictional works express ongoing debates often highly politicised concerning its various groups senses of identity and belonging in relation to the land and its denizens This often involves a pervasive tension between Western settler societies conceptions of modernity and indigenous world views each complicating the often simplistic binarisms drawn between them In this selection of papers from the 2006 Literature and Ecology Colloquium held in Grahamstown South Africa the complexities of forging imaginative and pragmatic senses of belonging in Southern Africa are explored from a variety of disciplinary perspectives philosophical historical botanical and anthropological as well as literary Their subject matter ranges widely from Bushmen testimonies to Berlin missionaries from prehistoric cave dwellers to Schopenhauer from white Batswana to lion tamers but find themselves echoing one another in intriguing and illuminating ways These are highly localised meditations on age old questions What does it mean to be human within a natural environment Why do we appear to be so damaging to the ecology that sustains us Is our presence inevitably toxic to our planetary fellow travellers How do we forge an ecologically sound sense of belonging in this post colonial post apartheid post modern era If this collection has a single most prominent question binding it together it is this What are the limits and potentialities of human compassion towards the natural world
