horror and the promise that It Gets Better and the threat that it might not challenge us to rethink how we read and engage with young people's media. Instead of imagining queer young adult literature as a subgenre defined by its visibly queer characters, Mason proposes that we see queer YA as a body of transmedia texts with blurry boundaries, one that coheres around affect, specifically anxiety, instead of content.

Performance Studies in Canada Laura Levin, Marlis Schweitzer, 2017-06-01

Since its inception as an institutionalized discipline in the United States during the 1980s, performance studies has focused on the interdisciplinary analysis of a broad spectrum of cultural behaviours, including theatre, dance, folklore, popular entertainments, performance art, protests, cultural rituals, and the performance of self in everyday life. *Performance Studies in Canada* brings together a diverse group of scholars to explore the national emergence of performance studies as a field in Canada. To date, no systematic attempt has been made to consider how this methodology is being taught, applied, and rethought in Canadian contexts, and Canadian performance studies scholarship remains largely unacknowledged within international discussions about the discipline. This collection fills this gap by identifying multiple origins of performance studies scholarship in the country and highlighting significant works of performance theory and history that are rooted in Canadian culture. Essays illustrate how specific institutional conditions and cultural investments, Indigenous, francophone, multicultural, and more, produce alternative articulations of performance and reveal national identity as a performative construct. A state-of-the-art work on the state of the field, *Performance Studies in Canada* foregrounds national and global performance knowledge to invigorate the discipline around the world.

Practising Immanence David A. G. Clarke, 2023-11-28

Practising Immanence: Living with Theory and Environmental Education makes creative contributions to both qualitative inquiry and environmental education by exploring how each of these ideas seep and fuse into one another, creating a space where methodology becomes pedagogy and where each of these is already always environmental, indivisible with life. Clarke's energising and innovative approach offers a challenge to conventional research practices and shows ways in which inquiry can be done differently. Drawing on new materialisms, affect theory, and the practical philosophy of Gilles Deleuze and Félix Guattari, the book details the PhD journey of the author, merging stories and theory, and stories of theory in the production of eight haecceities, a philosophical concept which prioritises the 'thisness' of a thing or event. This move allows a novel methodological approach whereby the haecceities act as sites of variation on the events of the book: the self as unstable and posthuman, the environment as everything immanent rather than as an overly romantic or a green version of nature, and the tensions that these moves create for ethical orientations in education, inquiry, and life in the Anthropocene. *Practising Immanence* brings theory to life through a diffractively critical style and a unique approach to environmental pedagogic practice. This radical and vitalising book will be of interest to those inspired to explore environmental problems and inquiry with each other, and to those drawn to creative relational narrative embodied and post-qualitative approaches to research.

peace and love to the greatest warrior in the DC transmedia universe as she's reflected increasing technological sophistication globalisation and women's changing roles and ambitions Wonder Woman's physical form Ormrod argues is both an articulation of female potential and attempts to constrain it Her body has always been an amalgamation of the feminine ideal in popular culture and wider socio cultural debate from Betty Grable to the 1960s mod girl to the Iron Maiden of the 1980s

Democratic Anarchy Matthew Scully, 2024-07-02 A dramatic and necessary rethinking of the meaning of Democracy Democratic Anarchy grapples with an uncomfortable but obvious truth inimical to democracy both aesthetics and politics depend on the structuring antagonism of inclusion and exclusion Yet in Democratic Anarchy Matthew Scully asks how can the people be represented in a way that acknowledges what remains unrepresentable What would it mean to face up to the constitutive exclusions that haunt U.S. democracy and its anxious fantasies of equality Synthesizing a broad range of theoretical traditions and interlocutors including Lacan Rancière Edelman and Hartman Democratic Anarchy polemically declares that there has never been nor can there ever be a realized democracy in the U.S. because democracy always depends on the hierarchical institution of a formal order by one part of the population over another Engaging with an expansive corpus of American literature and art Harriet Jacobs Nathaniel Hawthorne Louis Zukofsky Thomas Pynchon Toni Morrison Theresa Hak Kyung Cha Nari Ward Ocean Vuong and Safiya Sinclair Democratic Anarchy argues that many liberal concepts and institutions are in fact structurally opposed to democratic equality because they depend on regulating what can appear and in what form By focusing on works that disrupt this regulatory impulse Scully shows how rhetorical strategies of interruption excess and disorder figure the anarchic equality that inegalitarian fantasies of democracy disavow Democratic Anarchy develops a rigorous theory of equality that refuses to repeat the inequalities against which it positions itself and it does so by turning to moments of resistance both aesthetic and political inaugurated by the equality that inheres in and antagonizes the order of things

Hot Equations Jesse S. Cohn, 2024-04-23 Inspired by the new diversity of science fiction fantasy and horror in the twenty first century Hot Equations Science Fantasy and the Radical Imagination on a Troubled Planet confronts the kinds of literary and political realism that

continue to suppress the radical imagination Alluding both to the ongoing climate catastrophe and to Tom Godwin's *The Cold Equations* that famous touchstone of hard science fiction *Hot Equations* reads the crises of our post normal moment via works that increasingly subvert genre containment and spill out into the public sphere Drawing on archives and contemporary theory author Jesse S Cohn argues that these imaginative works of science fiction fantasy and horror strike at the very foundations of modernity calling its basic assumptions into question They threaten the modern order with a simultaneously terrible and promising anarchy pointing to ways beyond the present medical ecological and political crises of pandemic climate change and rising global fascism Examining books ranging from well known titles like *The Hunger Games* and *The Caves of Steel* to newer works such as *Under the Pendulum Sun* and *The Stone Sky* Cohn investigates the ways in which science fiction fantasy and horror address contemporary politics social issues and more The cold equations that established normal life in the modern world may be in shambles Cohn suggests but a *New Black Fantastic* makes it possible for the radical imagination to glimpse viable possibilities on the other side of crisis
