Architecture and Politics in Nigeria Nnamdi Elleh, 2016-12-08 In 1975 the Nigerian authorities decided to construct a new postcolonial capital called Abuja and together with several internationally renowned architects these military leaders collaborated to build a city for three million inhabitants Founded five years after the Civil War with Biafra which caused around 1 7 million deaths the city was envisaged as a place where justice would reign and where people from different social religious ethnic and political backgrounds would come together in a peaceful manner and work together to develop their

country and its economy These were all laudable goals but they ironically mobilized certain forces from around the country in opposition against the Federal Government of Nigeria The international and modernist style architecture and the fact that the government spent tens of billions of dollars constructing this idealized capital ended up causing more strife and conflict For groups like Boko Haram a Nigerian Al Qaida affiliate organization and other smaller ethnic groups seeking to have a say in how the country's oil wealth is spent Abuja symbolized everything in Nigeria they sought to change By examining the creation of the modernist national public spaces of Abuja within a broader historical and global context this book looks at how the successes and the failures of these spaces have affected the citizens of the country and have in fact radicalized individuals with these spaces being scene of some of the most important political events and terrorist targets including bombings and protest rallies Although focusing on Nigeria's capital the study has a wider global implication in that it draws attention to how postcolonial countries that were formed at the turn of the twentieth century are continuously fragmenting and remade by the emergence of new nation states like South Sudan

Foundation Reporter, 2003 **Tropentag 2022 - International Research on Food Security, Natural Resource Management and Rural Development** Eric Tielkes, 2022-09-09 Tropentag is the largest interdisciplinary conference in Europe focused on development oriented research in the fields of tropical and subtropical agriculture food security natural resource management and rural development Tropentag takes place annually even though the past two years were particularly challenging while the conference had to be organised as an online only event One of the lessons that we learnt from the virtual conferences is that yes it is possible to organise it that way but that it is much better to meet and talk in person We are thus very happy that this year two years

after what was initially planned we are able to organise the Tropentag 2022 conference at the campus of the Czech University of Life Sciences Prague Czech Republic and thrilled that we will again meet all face to face during the 14-16 September venue. However, some of you due to various reasons who could not come to Prague, you can still participate at this year's Tropentag as all plenary and oral scientific sessions are streamed via the Whova platform and we also organise several online poster sessions.
