University Of North West Potchefstroom Campus Prospectus 2016:

Open and Distance Education in Asia, Africa and the Middle East Olaf Zawacki-Richter, Adnan Qayyum, 2019-02-18 This book is open access under a CC BY 4.0 license. This book describes the history, structure and institutions of open and distance education in six countries: China, India, Russia, Turkey, South Africa and South Korea. It describes how open and distance education is evolving in a digital age to reflect the needs and circumstances of the national higher education systems in these countries. It also explores the similarities and differences between how their open and distance higher education systems are managed and structured. This book is the second in a series following *Open and Distance Education in Australia, Europe and the Americas* (Springer 2018). Both books compare and draw conclusions about the nature of open and distance education in the context of various national higher education systems. In a digital era characterized by the growing use of online open and distance education, this book will prove particularly valuable for policy makers and senior administrators who want to learn about establishing or expanding open and distance education services. In addition, it offers a valuable reference guide for researchers, academics and students interested in understanding the different approaches to open and distance education.

Water Resource Management and the Law Erkki J. Hollo, 2017-11-24. Scarcity of water, floods and erosion caused by climate change have made the management of water resources a challenge to national and international actors worldwide. States have also initiated water projects to improve social welfare, often with significant impacts on the environment. This book combines close analysis of the legal structures of water rights with consideration of the modes of water management projects to illustrate current water-related problems in terms of practical solutions in a global context.

Smart Futures, Challenges of Urbanisation, and Social Sustainability Mohammad Dastbaz, Wim Naudé, Jamileh Manoochehri, 2018-04-10. This book tackles the challenges posed by accelerating urbanization and demystifies Social Sustainability, the least understood of all the different areas of sustainable development. The volume's twin focus on these profoundly intertwined topics creates a nuanced and vitally important resource. Large migrations from rural areas to cities without appropriate planning and infrastructure improvements, including housing, education and health care optimization, have created significant challenges across the globe. The authors suggest technology-rich strategies to meet these challenges by careful application of data on population growth and movement to the planning, design and construction of operational infrastructures that can sustainably support our increasingly rapid population growth.

The Origin and Growth of Geography as a discipline at South Africa Universities Gustav Visser, 2016-09-20. The publication provides the first comprehensive text that reflects on a century of the development of geography as an academic discipline at South African universities. The book showcases a broad and textured review of South Africa's geography departments, their staff members, their times and the different Geographies they engaged in. The book lays the foundation from which more expansive individual departmental histories can be written in the future.

Accounting theories, practices, education and human capital formation trends, 2025-09-15. This book aims to

provide empirical and conceptual insights into contemporary accounting theories practices education and approaches adopted to advance human capital formation in the discipline Although new accounting practices have emerged in the modern world conceptual and empirical research that provides a holistic comprehensive understanding of these evolutions and human capital approaches used to promote capabilities formation in accounting remains scarce Contemporary research often focuses on developing a framework for integrating accounting practices while coverage of human capital development is limited Instead research strands on accountancy and human capital are growing separately without a comprehensive empirical and conceptual framework for integrating the two concepts Insights on accounting practices and human capital developments are necessary for building a holistic understanding of the two concepts and working towards adopting an interdisciplinary approach The findings in this book seek to advocate for the need to develop highly skilled generations who may meet the requisite accounting and financial capabilities required in the modern global economy This book adopts both conceptual and empirical methods to address the gap in the literature on the need for research that focuses on human capital formation in the accounting and finance discipline It contributes an interdisciplinary perspective on the intersectionality between accounting practice and the human capital formation of individuals who possess the requisite knowledge
