From #RhodesMustFall Movements to #HumansMustFall Movements Artwell Nhemachena, Jairo Kangira, 2021-05-14 Might it be possible that the world is being migrated into an era where the imperial periphery will be increasingly governed through Artificial Intelligence AI and robotics designed to replace human beings Celebrated as efficient strong unfailing tireless precise and beyond corruption AI and robots are set to replace African leaders who are imperially deemed to be and consistently condemned as corrupt failed weak and inefficient But if these AI and robots are neo imperial tools and machinations the million dollar question is whether empire is not returning to recolonise the supposedly inefficient Africans via the new technologies and machinism Where Africans once celebrated their liberation war movements empire has emplaced what it calls liberation technologies designed to supposedly liberate African youths from their own states and governments led by liberation movements Where Africans once celebrated their liberation war movements empire has placed its own NGOs CSOs spewing liberal ideologies designed to ostensibly liberate African youths from their own supposedly failed and corrupt states and government leaders With African youths citizens allying not with their liberation movements but with the liberation technologies and liberal NGOs CSOs it is not surprising why African citizens oppose their states led Fast Track Land Redistribution Programmes while ironically they happily celebrate Fast Tracked COVID 19 Vaccines Positing the notion of HumansMustFall movements this book underscores ways in which empire is in a process of eternal return to 21st century Africa The book is crucial for scholars and activists in political science government studies sociology anthropology cultural studies history languages and communication studies security studies military studies and development studies *Integrating Predation Risk Across Scales: From Neurons to Ecosystems and Milliseconds to Generations* Jacqueline Jeannette Blundell, Evan Preisser, 2020-06-04 [Uprooting University Apartheid in South Africa](#) Teresa A. Barnes, 2018-12-07 South Africa continues to be an object of fascination for people everywhere interested in social justice issues postcolonial studies and critical race theory as manifested by the enormous worldwide attention given to the RhodesMustFall movement In this book Teresa Barnes examines universities complex positioning in the apartheid era and argues that tracing the institutional legacies left by pro apartheid intellectuals are crucial to understanding the fight to transform South African higher education A work of interpretive social history this book investigates three historical dynamics in the relationship between the apartheid system and South African higher education First it explores how the legitimacy of apartheid was historically reproduced in public higher education Second it looks at ways that academics maneuvered through and influenced national and international discourses of political freedom and legitimacy Third it explores how and where stubborn tendrils of apartheid era knowledge production practices survived into and have been combatted during the democratic era in South African universities **Recalibrating teacher training in African higher education institutions** Sifiso Sibanda, Gideon (Deon) P. van Tonder, Washington T. Dudu, 2023-03-01 This book critically

examines the role of governments in promoting parity during and in post pandemic education This comes from the realisation that the pandemic has deepened the crisis by depleting the meagre resources that African countries might have devoted to normative educational practices where those on the margins would have been pushed further behind while the privileged would have been further initiated into the cultural and capital flows of private schools and historically research intensive institutions of higher learning This has far reaching implications for the education of underprivileged citizens and education particularly modes and modalities of delivery has to be reimagined to subvert the challenges wrought by the pandemic This book significantly bridges the gap between the pre and post COVID 19 pandemic pedagogical practices and the erstwhile modalities that have been resilient over time The book focuses on ways to stave off pedagogical challenges that face countries as the global pandemic makes its mark

Organise or Die? Raphaël Botiveau,2017-12-01 The story of one of the leading trade unions in South Africa the National Union of Mineworkers and its role in the struggle against white minority rule *Organise or Die* Democracy and Leadership in South Africa s National Union of Mineworkers NUM is the first in depth study of one of the leading trade unions in the country Founded in 1982 the trade union played a key role in the struggle against white minority rule before turning into a central protagonist of the ruling Tripartite Alliance after apartheid Deftly navigating through workerist social movement and political terrains that shape the South African labour landscape this book sheds light on the path that led to the unprecedented 2012 Marikana massacre the dissolution of the Congress of South African Trade Unions Cosatu federation and to fractures within the African National Congress ANC itself Working with the notions of organisational agency and strategic bureaucratisation Rapha l Botiveau shows how the founding leadership of NUM built their union s structures with a view to mirror those of the multinational mining companies NUM faced Good

leadership proved key to the union's success in recruiting and uniting mineworkers and NUM became an impressive school for union and political cadres producing a number of South Africa's top post-apartheid leaders. An incisive analysis of leadership styles and strategies shows how the fragile balance between an increasingly distant leadership and an increasingly militant membership gradually broke down. Botiveau provides a compelling narrative of NUM's powerful history and the legacy of its leadership. It will appeal to a broad readership including journalists, students and social sciences scholars interested in South Africa's contemporary politics and labour history.

Pursuing Justice in Africa Jessica Johnson, George Hamandishe Karekwaivanane, 2018-10-31. *Pursuing Justice in Africa* focuses on the many actors pursuing many visions of justice across the African continent: their aspirations, divergent practices and articulations of international and vernacular idioms of justice. The essays selected by editors Jessica Johnson and George Hamandishe Karekwaivanane engage with topics at the cutting edge of contemporary scholarship across a wide range of disciplines. These include activism, land tenure, international legal institutions and postconflict reconciliation. Building on recent work in sociolegal studies that foregrounds justice over and above concepts such as human rights and legal pluralism, the contributors grapple with alternative approaches to the concept of justice and its relationships with law, morality and rights. While the chapters are grounded in local experiences, they also attend to the ways in which national and international actors and processes influence for better or worse local experiences and understandings of justice. The result is a timely and original addition to scholarship on a topic of major scholarly and pragmatic interest. Contributors: Felicitas Becker, Jonathon L. Earle, Patrick Hoenig, Stacey Hynd, Fred Nyongesa, Ikanda Ngeyi, Ruth Kanyongolo, Anna Macdonald, Bernadette Malunga, Alan Msosa, Benson A. Mulemi, Holly Porter, Duncan Scott, Olaf Zenker.

Sustainable Urban Futures in Africa Michael Addaney, Patrick Cobbinah, 2021-12-30. *Sustainable Urban Futures in Africa* provides a variety of conventional and emerging theoretical frameworks to inform understandings and responses to critical urban development issues such as urbanisation, climate change, housing, slum informality, urban sprawl, urban ecosystem services and urban poverty among others within the context of the sustainable development goals (SDGs) in Africa. Chapters are written by a diverse range of African scholars and practitioners in urban planning and policy design, environmental science and policy, sociology, agriculture, natural resources management, environmental law and politics. Urban Africa has huge resource potential, both human and natural resources that can stimulate sustainable development when effectively harnessed. *Sustainable Urban Futures in Africa* provides support for the SDGs in urban Africa and will be of interest to students and researchers, professionals and policymakers and readers of urban studies, spatial planning, geography, governance and other
