Introduction to Marketing

Introduction

The term Marketing is derived from the Latin word 'Mercatus' which refers to "a place where business is conducted".

Marketing is a form of communication between a business house and its customers with the goal of selling its products or services to them. Goods are not complete products until they are in the hands of customers. Marketing is that management process through which goods and services move from concept to the customer. Marketing has less to do with getting customers to pay for a product as it does with developing a demand for that product and fulfilling the customer's needs.

Definitions of Marketing

According to Jevons, Market is "any body or persons who are in intimate business relation and carry on any extension transactions in any commodity".

Dr. Philip Kotler defines marketing as "the science and art of exploring, creating and delivering value to satisfy the needs of a target market at a profit. Marketing identifies unfulfilled needs and desires. It defines, measures and quantifies the size of the identified market and the profit potential. It pinpoints which segments the company is capable of serving best and it designs and promotes the appropriate products and services." Thus, marketing refers to all the activities involved in the creation of place, time, possession and awareness utilities and beyond.

Meaning of Marketing.

The activity or business of promoting and selling products or services, including market research and advertising.

Marketing is the process of exploring, creating, and delivering value to meet the needs of a target market in terms of goods and services;

Nature of Marketing

1. **Marketing is an economic function;** marketing embraces all the business activities involved in getting goods and services, from the hands of producers into the hands of final consumers. The Business steps through which goods progress on their way to final consumers is the concern of marketing.
2. **Marketing is a Legal process by which Ownership transfers;** In the process of

Operation Research Anup Goel,Ruchi Agarwal,2021-01-01 Operations research is the fast developing branch of science which deals with the most of the engineering activities It consist of many models which are used to obtain the optimum solution for different activities Operations research is a procedure which is executed iteratively for comparing various solutions till the optimum or satisfactory solution is obtained An important aspect of the optimal design process is the

formulation of the problem in a mathematical format which is acceptable to an algorithm and thus find out the optimal solution These techniques are extensively used in those engineering design problem where the emphasis is on maximising or minimising a certain goal This book is the introduction to the different techniques in operations research The subject does not require a high level of mathematical knowledge Each chapter of the book have examples from variety of fields Our hope is that this book through its careful explanations of concepts practical examples and techniques bridges the gap between knowledge and proper application of that knowledge Elementary Lessons in Heat, Light & Sound Daniel Evan Jones, 1891
