A Framework for Assessing Effects of the Food System National Research Council, Institute of Medicine, Board on Agriculture and Natural Resources, Food and Nutrition Board, Committee on a Framework for Assessing the Health, Environmental, and Social Effects of the Food System, 2015-06-17 How we produce and consume food has a bigger impact on Americans well being than any other human activity The food industry is the largest sector of our economy food touches everything from our health to the environment climate change economic inequality and the federal budget From the earliest developments of agriculture a major goal has been to attain sufficient foods that provide the energy and the nutrients needed for a healthy active life Over time food production processing marketing and consumption have evolved and become highly complex The challenges of improving the food system in the 21st century will require systemic approaches that take full account of social economic ecological and evolutionary factors Policy or business interventions involving a segment of the food system often have consequences beyond the original issue the intervention was meant to address *A Framework for Assessing Effects of the Food System* develops an analytical framework for assessing effects associated with the ways in which food is grown processed distributed marketed retailed and consumed in the United States The framework will allow users to recognize effects across the full food system consider all domains and dimensions of effects account for systems dynamics and complexities and choose appropriate methods for analysis This report provides example applications of the framework based on complex questions that are currently under debate consumption of a healthy and safe diet food security animal welfare and preserving the environment and its resources *A Framework for Assessing Effects of the Food System* describes the U S food system and provides a brief history of its evolution into the current system This report identifies some of the real and potential implications of the current system in terms of its health environmental and socioeconomic effects along with a sense for the complexities of the system potential metrics and some of the data needs that are required to assess the effects The overview of the food system and the framework described in this report will be an essential resource for decision makers researchers and others to examine the possible impacts of alternative policies or agricultural or food processing practices

Food Policy Janel Obenchain, Arlene Spark, 2015-08-26 Access to safe adequate and nutritionally balanced food is a cornerstone of public health *Food Policy Looking Forward from the Past* examines the influences of grassroots movements the government and industry on the US food systems The authors explore the intersection of food and nutrition and how policy influences this overlap They illumina

Foodies Josee Johnston, Shyon Baumann, 2014-12-19 This important cultural analysis tells two stories about food The first depicts good food as democratic Foodies frequent hole in the wall ethnic eateries appreciate the pie found in working class truck stops and reject the snobbery of fancy French restaurants with formal table service The second story describes how food operates as a source of status and distinction for economic and cultural elites indirectly maintaining and reproducing social inequality While the first storyline insists that anybody can

be a foodie the second asks foodies to look in the mirror and think about their relative social and economic privilege By simultaneously considering both of these stories and studying how they operate in tension a delicious sociology of food becomes available perfect for teaching a broad range of cultural sociology courses *Food Fights* Charles C.

Ludington,Matthew Morse Booker,2019-08-29 What we eat where it is from and how it is produced are vital questions in today s America We think seriously about food because it is freighted with the hopes fears and anxieties of modern life Yet critiques of food and food systems all too often sprawl into jeremiads against modernity itself while supporters of the status quo refuse to acknowledge the problems with today s methods of food production and distribution *Food Fights* sheds new light on these crucial debates using a historical lens Its essays take strong positions even arguing with one another as they explore the many themes and tensions that define how we understand our food from the promises and failures of agricultural technology to the politics of taste In addition to the editors contributors include Ken Albala Amy Bentley Charlotte Biltekoff Peter A Coclanis Tracey Deutsch S Margot Finn Rachel Laudan Sarah Ludington Margaret Mellon Steve Striffler and Robert T Valgenti *Achieving Food Security in China* Zhang-Yue Zhou,2017-05-18 China s food security has never failed to attract the public s attention Feeding China s large population has always been a huge challenge The latest large scale famine took place in 1958 62 during which approximately 37 million people died of starvation However since the early 1980s China s food availability has improved drastically The important question is then has China achieved its food security Although China s food availability has significantly improved it has not achieved a high level of food security due to the lack of progress in several other important dimensions of food security The book examines China s food security practices in the past six decades explores the root causes that led to food shortages or abundances and elaborates on the challenges that China has to deal with in order to improve its future food security China s quest for food security serves as a valuable lesson for many other countries to learn through China s experiences and to better manage their food security in the future The book also draws attention to the fact that China s food security status has a huge impact on the global community and hence global collaboration is a mutually beneficial approach *Human Rights Of, By, and For the People* Keri Iyall Smith,Louis Edgar Esparza,Judith Blau,2017-02-03 Together the US Constitution and the Bill of Rights comprise the constitutional foundation of the United States These the oldest governing documents still in use in the world urgently need an update just as the constitutions of other countries have been updated and revised *Human Rights Of By and For the People* brings together lawyers and sociologists to show how globalization and climate change offer an opportunity to revisit the founding documents Each proposes specific changes that would more closely align US law with international law The chapters also illustrate how constitutions are embedded in society and shaped by culture The constitution itself sets up contentious relationships among the three branches of government and between the federal government and each state government while the Bill of Rights and subsequent amendments begrudgingly recognize the civil and political rights of citizens These rights are described by

legal scholars as negative rights specifically as freedoms from infringements rather than as positive rights that affirm personhood and human dignity The contributors to this volume offer positive rights instead The Universal Declaration of Human Rights UDHR written in the middle of the last century inspires these updates Nearly every other constitution in the world has adopted language from the UDHR The contributors use intersectionality critical race theory and contemporary critiques of runaway economic inequality to ground their interventions in sociological argument

The Undergraduate Experience Peter Felten, John N. Gardner, Charles C. Schroeder, Leo M. Lambert, Betsy O. Barefoot, Freeman A. Hrabowski, 2016-04-22 A clear practical framework for getting higher education back on track The Undergraduate Experience is a guide for significantly improving student learning and institutional performance in the rapidly changing world of higher education Written by recognized experts in undergraduate education this book encourages college and university leaders to rethink current practices that fragment the student experience and to focus on creating powerful integrated undergraduate learning for all students Drawing from their own deep experience and the latest research the authors reveal key principles that enable institutional change and enhance student outcomes in any higher education setting Coverage includes high impact practices for engagement the importance of strategic leadership the necessity of setting and maintaining high expectations and insight on fostering excellence through systematic planning Through its core themes and action principles this book can be a valuable resource for faculty staff administrators and governing boards at all types of postsecondary institutions The book provides a practical framework for achieving excellence in undergraduate education by focusing on Learning Relationships Expectations Alignment Improvement Leadership The value of an undergraduate education is under greater scrutiny than ever before and campus leaders must be able to convey the value of their institutions to students boards donors and legislators Is a college or university degree worth the increasing cost Are today's students academically adrift What's the difference between a degree and an education Responding to these questions requires focused action by individuals and institutions The Undergraduate Experience offers practical guidance for creating and sustaining excellence in the face of disruption and change in higher education

In order to explore such a path, this study analyses the potential of political factors, policies and institutions for the reduction of climate change induced or aggravated conflicts between farmers and herders. After a theoretical demonstration, a case study of agro-pastoral conflicts in Burkina Faso, Côte d'Ivoire and Ghana is conducted.

Captivating Technology Ruha Benjamin, 2019-06-07. The contributors to *Captivating Technology* examine how carceral technologies such as electronic ankle monitors and predictive policing algorithms are being deployed to classify and coerce specific populations and whether these innovations can be appropriated and reimagined for more liberatory ends.

The Eurasian Wheat Belt and Food Security Sergio Gomez y Paloma, Sébastien Mary, Stephen Langrell, Pavel Ciaian, 2016-10-11. This book provides an in-depth analysis of the wheat production developments in the Eurasian region and assesses the potential contribution of the region to domestic and international food security. In particular, the book covers policy and institutional developments of the agricultural sector in Eurasia with a special focus on the horizontal issues relevant to the current and future potential growth of the wheat production such as land policy, credit and finance, privatization, farm restructuring and environmental challenges. Global food security is a major societal concern in the light of an increasing population which is projected to grow from around seven billion today to almost 10 billion in 2050. Two most likely ways to achieve the much needed food production growth are expansion of land cultivation or increase in crop yields and total factor productivity. The only region with a significant amount of uncultivated arable land that is at the same time experiencing rising agricultural productivity is the Eurasian wheat belt comprising of Russia, Ukraine, Kazakhstan and the Central Asian countries: Uzbekistan, Tajikistan, Turkmenistan and Kirgizstan. This makes the region a potential hotspot for driving the future growth of global agriculture. Such prospects require a detailed investigation of Eurasia's future perspectives in terms of food production with a focus on wheat and its potential contribution to regional and global food security.

Civic Engagement in Food System Governance Alan R. Hunt, 2015-10-05. The local food movement is one of the most active of current civil engagement social movements. This work presents primary evidence from over 900 documents, interviews and participant observations and provides the first descriptive history of local food movement, national policy achievements in the US from 1976 to 2013 and in the UK from 1991 to 2013 together with reviews of both the American and British local food movements. It provides a US-UK comparative context significantly updating earlier comparisons of American, British and European farm and rural policies. The comparative perspective shows that over time more effective strategies for national policy change required social movement building strategies such as collaborative policy coalitions, capacity building for smaller organizations and policy entrepreneurship for joining together separate rural, farming, food and health interests. In contrast, narrowly defined single issue campaigns often

undermined long term policy change even if short term wins emerged By profiling interviews of American and English movement leaders policymakers and funders the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences Nutrition in Public Health Arlene Spark,Lauren M. Dinour,Janel Obenchain,2015-09-22 This second edition of a bestseller Nutrition in Public Health Principles Policies and Practice focuses on the role of the federal government in determining nutrition policy and influencing practice Beginning with an overview of public health principles the book examines the application of nutritional policy to dietary guidance health promot The Value of Food Loss and Waste: Not All Food Is Created Equal Karen A. Giagnoni concludes with an appeal against any form of social segregation because only direct contact massive prolonged equal and intimate as Howard Zinn argued will cure the stereotyping and prejudice that feed ignorance and foster fear
