Uncommonly Good Ideas Sandra Murphy, Mary Ann Smith, 2015-04-03 This innovative resource provides teachers with a road map for designing a comprehensive writing curriculum that meets Common Core State Standards The authors zero in on several big ideas that lead to and support effective practices in writing instruction such as integrating reading writing speaking and listening teaching writing as a process extending the range of the students writing spiraling and scaffolding a writing curriculum and collaborating These ideas are the cornerstone of best research based practices as well as the CCSS for writing The first chapter offers a complete lesson designed around teaching narrative writing and illustrates tried and true practices for teaching writing as a process The remaining chapters explore a broad range of teaching approaches that help students tackle different kinds of narrative informational and argumentative writing as well as complexities like audience and purpose Each chapter focuses on at least one of the uncommonly good ideas and illustrates how to create curricula around it *Uncommonly Good Ideas* includes model lessons and assignments mentor texts teaching strategies student writing and practical guidance for moving the ideas from the page into the classroom

The Question of Space Marijn Nieuwenhuis, David Crouch, 2017-09-29 The spatial turn has been deeply influential across the humanities and social sciences for several decades Yet despite this long term influence most volumes focus mainly on geography and tend to take a Eurocentric approach to the topic *The Question of Space* takes a multidisciplinary approach to understanding how the spatial turn has affected other disciplines By connecting developments across radically different fields the volume bridges the very borders that separate the academic space From new geographies through performance the internet politics and the arts the distinctive chapters undertake conversations that often surprisingly converge in approach questions and insights Together the chapters transcend longstanding disciplinary boundaries to build a constructive dialogue

around the question of space

Fanon, iek, and the Violence of Resistance Zahi Zalloua, 2025-06-26 In a novel pairing of anti colonial theorist Frantz Fanon with Marxist Lacanian philosopher Slavoj iek Zahi Zalloua explores the ways both thinkers expose the violence of political structures This inventive exploration advances an anti racist critique describing how ontology operates in a racial matrix to produce some human bodies that count and others deemed not quite or non human that do not For Fanon and iek the violence of ontology must be met with another form of violence a revolutionary violence that delegitimizes the logic of the symbolic order and troubles its collective fantasies Whereas Fanon begins his challenge to ontology by exposing its historical linkages to Europe s destructive imperialist procedures before proceeding to stretch Marxism along with psychoanalysis to account for the crushing neo colonial situation iek premises his work on the refusal to accept the totality of ontology Because of these different points of intervention Fanon and iek together offer a powerful and multifaceted assessment of the liberal anti racist paradigm whose propensity for identity politics and aversion to class struggle silence the cry of the dispossessed and foreclose radical change Avoiding contemporary separatist temptations decoloniality and Afropessimism and breaking with a non violent sentimentalist futurology that announces more of the same Fanon and iek point in a different direction one that eschews identitarian thought in favor of a collective struggle for freedom and equality

After Certainty Robert Pasnau, 2017 No part of philosophy is as disconnected from its history as is epistemology *After Certainty* offers a reconstruction of that history understood as a series of changing expectations about the cognitive ideal that beings such as us might hope to achieve in a world such as this The story begins with Aristotle and then looks at how his epistemic program was developed through later antiquity and into the Middle Ages before being dramatically reformulated in the seventeenth century In watching these debates unfold over the centuries one sees why epistemology has traditionally been embedded within a much larger sphere of concerns about human nature and the reality of the world we live in It ultimately becomes clear why epistemology today has become a much narrower and specialized field concerned with the conditions under which it is true to say that someone knows something Based on a series of lectures given at Oxford University Robert Pasnau s book ranges widely over the history of philosophy and examines in some detail the rise of science as an autonomous discipline Ultimately Pasnau argues that we may have no good reasons to suppose ourselves capable of achieving even the most minimal standards for knowledge and the final chapter concludes with a discussion of faith and hope

The Routledge Handbook of the History and Sociology of Ideas Stefanos Geroulanos, Gisèle Sapiro, 2023-09-26 The Routledge Handbook of the History and Sociology of Ideas establishes a new and comprehensive way of working in the history and sociology of ideas in order to obviate several longstanding gaps that have prevented a fruitful interdisciplinary and international dialogues Pushing global intellectual history forward it uses methodological innovations in the history of concepts gender history imperial history and history of normativity many of which have emerged out of intellectual history in recent years and it especially foregrounds the role of field theory for

delimiting objects of study but also in studying transnational history and migration of persons and ideas The chapters also explore how intellectual history crosses the study of particular domains law politics economy science life sciences social and human sciences book history literature and emotions A Cultural History of Ideas in the Medieval Age Dallas G. The Transnationalized Social Question Thomas Faist, 2018-11-30 The social question is back Yet today s social question is not primarily between labour and capital as it was in the nineteenth century and throughout much of the twentieth The contemporary social question is located at the interstices between the global South and the global North It finds its expression in movements of people seeking a better life or fleeing unsustainable social political economic and ecological conditions It is transnationalized not only because migrants and their significant others entertain ties across the borders of national states staying in touch with family and friends receiving or sending financial remittances in transnational social spaces Also of importance are cross border recruitment schemes for workers and the cross border diffusion of norms appealed to in the case of migration for example the social right to decent work as a human right Moreover migration can become an issue of inclusion or exclusion in fields important to life chances in the emigration transit or immigration states a transnationalization of national states And as in the nineteenth century political conflicts arise constituting the social question as a public concern In earlier periods class differences dominated conflicts While class has always been criss crossed by manifold heterogeneities not least of all cultural ones around ethnicity religion and language it is these latter heterogeneities that have sharpened in situations of immigration and emigration over the past decades Casting a wide net in terms of conceptual and empirical scope this book tackles both the

social structure and the politics of social inequalities It sets a comprehensive agenda for research which also includes the public role of social scientists in dealing with the transnationalized social question

Essays on Diverse Topics Kalman Dubov, 2021-12-23 This revised and updated volume includes twenty two essays on timely topics The volume begins with topics on Judaism and Jewish Ideology the book reviews the multiplicity of languages Jewish people used throughout their history At last count these number 55 an amazing way to create a localized language for daily interaction rather than use Hebrew the sacred language reserved for prayer and study The brief review of Lurianic Kabbalah follows together with a discussion of human suffering The mystery of Ashkenazic Jewry follows offering a serious question to this dilemma What follows is an exposition on the Jewish law of mosur the informer and the many issues affecting sexual predation in ultra Orthodox Judaism both in the United States and Australia as in Israel The Cairo Genizah reviews how two Scottish sisters brought the Book of Ecclesiasticus to Cambridge and the vast treasure of Cairo brought to Cambridge and other universities to examine this ancient repository The issue of Apostate Rabbis follows discussing several rabbis who converted to Christianity I then discuss the Radhanites the mysterious group of super merchants who traveled from France to China and back for about 500 years centuries before Marco Polo I then discuss Chabad Messianism a topic of interest as Chabad expands its message across the globe Several topics follow Medieval Blood Libel the mystery of Jews in Sri Lanka today a minimal number but in earlier centuries numbering several thousand I then discuss several topics on the human condition essays designed to reflect on Man's ethical dilemma of life in the post World War Two era I then discuss the two original ideas regarding religion One of these is attributed to the Patriarch Abraham whose reflection on Deity and how to relate to spirituality predominates in the three great Western religions The other original thought is found in Hinduism reflecting an entirely different way to relate to Deity Because Hinduism is a Far Eastern phenomenon not readily accessible in the West I've included an overview of Hinduism so that the Western and Jewish views can be appreciated A new topic reflect on the Atrocity Soul and its counterpart reflecting of the Son of Darkness and the Son of Light each bringing messages one of despair and darkness and the other of hope and redemption While these persons may be religious it is not a primary matter to the Son of Light but their message of hope predominates I conclude the book with a discussion on Calculating Zero an advancement only made twice in human history in the New World by the Maya and by the ancient Mesopotamians Each of the essays and reviews reflects my understanding of these and other diverse topics Each essay provides grist for discussion and reflection

Theories of Informetrics and Scholarly Communication Cassidy R. Sugimoto, 2016-02-22 Scientometrics have become an essential element in the practice and evaluation of science and research including both the evaluation of individuals and national assessment exercises Yet researchers and practitioners in this field have lacked clear theories to guide their work As early as 1981 then doctoral student Blaise Cronin published The need for a theory of citing a call to arms for the fledgling scientometric community to produce foundational theories upon which the work of the field could be based

More than three decades later the time has come to reach out the field again and ask how they have responded to this call This book compiles the foundational theories that guide informetrics and scholarly communication research It is a much needed compilation by leading scholars in the field that gathers together the theories that guide our understanding of authorship citing and impact **Rethinking Brechtian Film Theory and Cinema** Angelos Koutsourakis,2018-09-20

Making a compelling argument for the continuing relevance of Brechtian film theory and cinema this book offers new research and analysis of Brecht the film and media theorist placing his scattered writings on the subject within the lively film theory debates that took place in Europe between the 1920s 2 01960s **A Theory of Virtual Agency for Western Art**

Music Robert S. Hatten,2018-09-06 In his third volume on musical expressive meaning Robert S Hatten examines virtual agency in music from the perspectives of movement gesture embodiment topics tropes emotion narrativity and performance Distinguished from the actual agency of composers and performers whose intentional actions either create music as notated or manifest music as significant sound virtual agency is inferred from the implied actions of those sounds as they move and reveal tendencies within music stylistic contexts From our most basic attributions of sources for perceived energies in music to the highest realm of our engagement with musical subjectivity Hatten explains how virtual agents arose as distinct from actual ones how unspecified actants can take on characteristics of virtual human agents and how virtual agents assume various actorial roles Along the way Hatten demonstrates some of the musical means by which composers and performers from different historical eras have staged and projected various levels of virtual agency engaging listeners imaginatively and interactively within the expressive realms of their virtual and fictional musical worlds Peculiar Attunements Roger Mathew Grant,2020-03-03 Peculiar Attunements places the recent turn to affect into conversation with a parallel movement in European music theory of the eighteenth century During that time the affects or passions as they were also called formed a vital component of a mimetic model of the arts Eighteenth century critics held that artworks imitated or copied the natural world in order to produce copies of the affects in their beholders But music caused a problem for such theories since it wasn't apparent that musical tones could imitate anything with any dependability beyond the rare thunderclap or birdcall Struggling to articulate how it was that music managed to move its auditors without imitation certain theorists developed a new affect theory crafted especially for music postulating that music's physical materiality as sound vibrated the nerves of listeners and attuned them to the affects through sympathetic resonance This was a theory of affective attunement that bypassed the entire structure of representation offering a non discursive corporeal alternative It is a pendant to contemporary theories of affect and one from which they have much to learn Inflecting our current intellectual moment through eighteenth century music theory and aesthetics this book offers a reassessment of affect theory's common systems and processes It offers a new way of thinking through affect dialectically drawing attention to patterns and problems in affect theory that we have been given to repeating Finally taking a cue from eighteenth century theory it gives renewed attention to

the objects that generate affects in subjects The SAGE Handbook of Research in International Education Mary Hayden, Jack Levy, Jeff Thompson, 2015-10-13 The landscape of international education has changed significantly in the last ten years and our understanding of concepts such as international global and multicultural are being re evaluated Fully updated and revised and now including new contributions from research in South East Asia the Middle East China Japan Australasia and North America the new edition of this handbook analyses the origins interpretations and contributions of international education and explores key contemporary developments including internationalism in the context of teaching and learning leadership standards and quality in institutions and systems of education the promotion of internationalism in national systems This important collection of research is an essential resource for anyone involved in the practice and academic study of international education including researchers and teachers in universities governmental and private curriculum development agencies examination authorities administrators and teachers in schools **Debates in the Digital Humanities 2016** Matthew K. Heidegger and Executive Education Toby Thompson, 2017-09-13 Global corporations and the senior executives who oversee them have been subject to great criticism in recent times not only do such corporations hold extreme concentrations of wealth but they continue to sanction staggering pay inequalities between the haves and the have nots At the same time university based business schools are conducting programmes of executive education seemingly customised to sanction these same inequalities Heidegger and Executive Education is a piece of critical philosophy that has been written from within the business school in order to examine how this sheltered process of educating in role corporate executives operates Thompson claims that executive education is based on a very simple premise that an executive executes an order and that executive education is an amelioration of that process Thompson argues that the easiest way to conceive of executive education is to treat order and execution as cognates as a single conceptual entity Thus he asks if educating executives in line with the order execution cognate involves swapping the boardroom for the classroom and in keeping with the critical tag shouldn't executive education be about questioning not only the execution but also the dominant order The author uses time as the philosophical method by which one can undo the order execution cognate question the sanctity of the cognate and thereby halt the seemingly inexorable temporal sequence from order through to those orders becoming executed This book uses Martin Heidegger's exotic philosophy of time in order to mount a philosophical challenge to the temporal sequentiality of

executive education It will therefore be of great interest to academics researchers and postgraduates who are interested in Heidegger the philosophy of education and executive education It should also be essential reading for those involved in training developing and educating corporate executives River Life and the Upspring of Nature Naveeda Khan,2022-12-19 In River Life and the Upspring of Nature Naveeda Khan examines the relationship between nature and culture through the study of the everyday existence of chauras the people who live on the chars sandbars within the Jamuna River in Bangladesh Nature is a primary force at play within this existence as chauras live itinerantly and in flux with the ever changing river flows where land is here today and gone tomorrow the quality of life itself is intertwined with this mutability Given this centrality of nature to chaura life Khan contends that we must think of nature not simply as the physical landscape and the plants and animals that live within it but as that which exists within the social and at the level of cognition the unconscious intuition memory embodiment and symbolization By showing how the alluvial flood plains configure chaura life Khan shows how nature can both give rise to and inhabit social political and spiritual forms of life Routledge Handbook of Media, Conflict and Security Piers Robinson,Philip Seib,Romy Frohlich,2016-11-10 This Handbook links the growing body of media and conflict research with the field of security studies The academic sub field of media and conflict has developed and expanded greatly over the past two decades Operating across a diverse range of academic disciplines academics are studying the impact the media has on governments pursuing war responses to humanitarian crises and violent political struggles and the role of the media as a facilitator of and a threat to both peace building and conflict prevention This handbook seeks to consolidate existing knowledge by linking the body of conflict and media studies with work in security studies The handbook is arranged into five parts Theory and Principles Media the State and War Media and Human Security Media and Policymaking within the Security State New Issues in Security and Conflict and Future Directions For scholars of security studies this handbook will provide a key point of reference for state of the art scholarship concerning the media security nexus for scholars of communication and media studies the handbook will provide a comprehensive mapping of the media conflict field **The Mediated Mind** Susan Zieger,2018-06-05 How did we arrive at our contemporary consumer media economy Why are we now fixated on screens imbibing information that constantly expires and longing for more direct or authentic kinds of experience The Mediated Mind answers these questions by revisiting a previous media revolution the nineteenth century explosion of mass print Like our own smartphone screens printed paper and imprinted objects touched the most intimate regions of nineteenth century life The rise of this printed ephemera and its new information economy generated modern consumer experiences such as voracious collecting and curating fantasies of disembodied mental travel and information addiction Susan Zieger demonstrates how the nineteenth century established affective psychological social and cultural habits of media consumption that we still experience even as pixels supersede paper Revealing the history of our own moment The Mediated Mind challenges the commonplace assumption that our own new media lack a past or that our

own experiences are unprecedented
