Crowdfunding and Sustainable Urban Development in Emerging Economies Benna, Umar G., Benna, Abubakar U., 2018-02-28 Economic and societal systems continually evolve as the needs and demands of society change. With the development of new technologies, research and discoveries, various opportunities emerge for venture development and developing economies. Crowdfunding and Sustainable Urban Development in Emerging Economies provides innovative research on current issues in the rise of new platforms for digital activities, a collaborative economy, crowdsourcing, crowdfunding, and other activities that are shaping developing countries. Highlighting a range of pertinent topics such as infrastructure, finance, tertiary educational institutions, and urban sustainability, this book is an important resource for academicians, practitioners, researchers, and students.

Imaging and Assessing Mobile Technology for Development

Richard Musabe, John Sören Pettersson, 2024-04-08 Imaging and assessing mobile technology for development. M4D means understanding the use of appropriate technologies and services and how they directly or indirectly address socio-economic challenges. This book adopts various perspectives to identify the obstacles to affordable digital technologies in order to enable, enhance, and effect development. The book plays on the tension between success reports and optimistic projections on one hand and empirical evidence of technological belly splash on the other hand. The areas covered include infusion of service education in computing education, the Rwandan establishment of African Centres of Excellence to promote the development of appropriate technology, the metaverse's realisation in a mobile network-enabled metaversity, and difficulties detected when evaluating digitisation of distance learning, students' security awareness, dissemination of agricultural information, and mobile payment. The decolonisation of community-based media and attempts to step outside the mobile network and Internet are also covered.

Decoloniality, Language and Literacy Carolyn McKinney, Pam Christie, 2021-12-20

Through a range of unconventional genres, representations of data and dialogic, reflective narratives alongside more traditional academic genres, this book engages with contexts of decoloniality and border thinking in the Global South. It addresses processes of knowledge production and participation in the highly divided and unequal schooling and higher education system in South Africa and highlights the consequences of the monolingual myth in post-colonial education, demonstrating opportunities for learning provided by translanguaging. It explores both embodied multimodal and multilingual instances of knowledge making in teaching and teacher education that take place outside but alongside formal classroom lecture and seminar modes and the positionality and learning experiences of teacher educators in science literacy and language across the curriculum. The book is not only transdisciplinary but also captures the learning that takes place beyond the borders of disciplines and formal classroom spaces.

Multidisciplinary Approach to Information Technology in Library and Information Science Holland, Barbara, Sinha, Keshav, 2024-02-14 In the ever evolving landscape of information technology within library and information science scholars often find themselves navigating a complex web of diverse research areas The broad spectrum

of topics ranging from digital libraries to artificial intelligence poses a significant challenge for academic scholars seeking a comprehensive understanding of the field's intricacies. The absence of a consolidated resource tailored to the specific needs of graduate students, professors, and practitioners further exacerbates this issue. **Multidisciplinary Approach to Information Technology in Library and Information Science** addresses the pressing challenges faced by scholars in the realm of library and information science. This reference handbook serves as a beacon illuminating the multifaceted interactions and impacts of technologies on information resources. This book delves into the ethical, legal, and social implications of information technology across diverse contexts: libraries, information centers, archives, museums, education, business, government, and healthcare.

Sustainable Agriculture and Food Security Walter Leal Filho, Marina Kovaleva, Elena Popkova, 2022-07-28. This book describes initiatives and concrete examples on sustainable food production worldwide. In the current world scenario where nations all over the world are struggling to accomplish the United Nations Sustainable Development Goals and to ensure sustainable patterns for all, this book provides a contribution towards a more comprehensive and interdisciplinary understanding of the cross-cutting issues related to Sustainable Agriculture and Food Security. This interdisciplinary book supports the efforts to engage a commitment from all fields of science to work together to provide knowledge that could help to address SDG2: No hunger and lead to the promotion of quality of life by means of a more sustainable food production and improved food security. This book is expected to fill the gap of publications in this field. It gives a special emphasis to a state-of-the-art description of approaches, methods, initiatives, and projects from universities, stakeholders, organizations, and civil society across the world regarding cross-cutting issues in sustainable food production. It includes examples of policies and practices, case studies, examples of projects, institutional policies, innovative methods and tools, and research outputs which highlight the interdependence between sustainable agriculture and food security issues. It is expected that the Sustainable Agriculture and Food Security will make the many benefits of sustainable food production clearer and inter alia lead to an increase in the emphasis provided to this central theme.

Vermicomposting for Sustainable Food Systems in Africa Hupenyu Allan Mupambwa, Lydia Ndinelao Horn, Pearson Nyari Stephano Mnkeni, 2023-03-01. This edited book collates the research done mainly in Africa on vermicomposting and related technologies that can assist African smallholder farmers in making nutrient-rich organic fertilizers from their animal and crop residue wastes. Information on the development of organic sources of liquid fertilizer development for hydroponics is also presented. The book presents research findings on vermicomposting in a simplified way that will allow farmers and extension workers to adopt the indicated technologies. The book also covers critical aspects of standardization of vermicompost preparation, earthworm biology, nutrient enrichment of composts, and organic liquid fertilizer production. Vermicomposting is a technology that employs earthworms to enhance the biodegradation and fertilizer value of organic wastes. The earthworms optimize the biodegradation ecosystem during composting, resulting in a final nutrient-rich product with more recalcitrant forms of carbon and much lower levels of

veterinary antibiotics and their metabolites Vermicompost as an organic fertilizer is highly preferred over other forms of soil enhancers A lot of research has been done on vermicompost and related activities in Africa but remain scattered across various publications The book is an invaluable source of information for farmers especially those practicing organic crop production vermicomposting researchers as well as extension workers
