University Community Engagement and Lifelong Learning Julia Preece, 2017-07-13 This book offers a conceptual re think of how university community engagement functions as a lifelong learning resource for communities While having a specific focus on the South African context it has important implications for other universities which are concerned with their communities and makes a compelling argument for the university as a public good in spite of current trends towards marketization and commodification of higher education The book draws on a theoretical framework of capabilities asset based community development and the adult learning concept of dialogue to propose a model whereby the boundary walls of the university become metaphorically porous so that community members feel free to interact with the university as equal members of society A historical outline of African universities is provided as well as an exploration of the evolution of terms for community engagement service learning and learning cities and an examination of the policy and practice implications for the ideological model of a porous university

players and or social networks Social disparity is another serious problem It is deeply rooted in history in the emerging states such as South Africa and many Latin American countries However income distribution is recently deteriorating even in East Asia that was once praised for its high economic growth with equity Increasing pressure for political opening is another challenge for emerging states This volume argues that the economic social and political problems are interwoven in the sense that the emerging states need to build political consensus in order to tackle the economic and social difficulties Democratic institutions have not always been successful in this respect
