Perspectives in Nutrition and Sustainable Diets in Africa Hettie Carina Schönfeldt, Gloria Essilfie, Yunyun Gong, 2024-05-06

Africa is confronted with the triple burden of malnutrition it is also faced with the triple challenges of poverty inequality and unemployment In many African countries large proportions of the population rely on agriculture not only for their food but also for their livelihoods A transformed agricultural and food system is thus a necessary condition for addressing this double triple challenge Additionally post harvest and food waste and losses reduce the availability of sufficient quantities of safe edible and preferable foods At least one third of food produced at farm level is lost due to inappropriate storage infrastructure and agro processing technologies in developing countries and one third of food purchased is wasted at household and retail level

Liminality in Tourism Robert S. Bristow, Ian Jenkins, 2021-09-05 Liminality is not typically associated with tourism even though it can be viewed as an intrinsic element of the social cultural experiences of tourism *Liminality in Tourism Spatial and Temporal Considerations* aims to build upon the tradition of liminality as expounded in social and anthropological disciplines elaborating on the theoretical principles and concepts found within certain aspects of the tourist journey and tourist product The emergence of post modern society has impelled a change in the tourist gaze towards a more experiential and adventuresome globalised experience An important aspect of the tourist phenomenon of liminality is where a transformative experience is triggered by entering a liminoid tourist space leaving the tourist permanently psychologically transformed before returning to normalised society The narrative provides a new perspective on the tourist experience with a provocative examination into the multidimensional aspects of tourism by exploring tourism within the spatial and temporal aspects of liminal landscapes Covid 19 has further changed the rubric of tourism Until the current pandemic tourism has basically been a fun experience In a post pandemic world however the tourist is now facing an unknown future which will almost certainly affect tourism liminality This book presents the reader with a wealth of examples and case studies closely illustrating the association between tourism and liminal experiences The geographical perspectives explore the more subconscious outcomes of destination and tourist product consumption The book should be a useful reader to tourism geography where the theory of liminality can be synthesized into tourist experiences The chapters in this book were originally published as a special issue of the journal *Tourism Geographies*

Handbook of Phytonutrients in Indigenous Fruits and Vegetables Dharini Sivakumar, Yasmina Sultanbawa, Michael Netzel, 2022-10-31 The effects of inadequate diets on the population include malnutrition non communicable diseases and obesity Hidden hunger also known as micronutrient deficiencies leads to various health related disorders and diseases Indigenous plants in the form of indigenous fruits and leafy vegetables are gaining interest as a source of nutrients and bioactive phytochemicals satisfying both food demand and health needs Moreover with the impact of climate change and the importance of sustainability of food systems it is essential that we investigate new forgotten and alternative crops that can thrive in harsh conditions require low fertilizer input and are easily harvestable This is an essential resource for academic researchers and industry professionals in
