University-Community Partnerships for Promoting Social Responsibility in Higher Education Enakshi

Sengupta,Patrick Blessinger,Craig Mahoney,2020-07-24 This book provides empirical evidence on how universities have considered social responsibilities as their prime focus and engaged with civil society to enhance their values Case studies from Indonesia to the United Kingdom enrich the book through experience interventions and narratives Utopia and Its Discontents Sebastian Mitchell,2020-02-20 Utopia and Its Discontents traces literary representations of ideal communities from Plato to the 21st century Each chapter offers close readings of key utopian and anti utopian texts to demonstrate how they construct challenge and explore the ideas and forms of earlier utopian writings and the social and political ideals of their own periods In this original and insightful study Sebastian Mitchell demonstrates how literary utopias are often as much about the past as they are about the present and the future Utopia and Its Discontents concludes by arguing against the idea that the utopian has been eclipsed by the dystopian in contemporary culture Topics covered include Early political and philosophical authors such as Plato and Thomas More Literary works from Jonathan Swift s Gulliver s Travels to George Orwell s Nineteen Eighty Four Speculative fiction writers such as H G Wells Aldous Huxley and Margaret Atwood Ecological and feminist texts by Ernest Callenbach Ursula Le Guin and Marge Piercy Twenty first century utopianism This is an essential study for scholars and students of utopian literature The Emerald Handbook of Sustainable Energy Transition and Social Justice Julius Omokhudu Irene,Bridget Nneka Irene,Kingsley Obi Omeihe,Regina Frank,2025-09-08 The Emerald Handbook of Sustainable Energy Transition fosters a more profound understanding of research and discourse on sustainability across the Global South deconstructs the current thinking *People - Marine Mammal Interactions* Andrew Butterworth,Mark P. Simmonds,2017-08-15 Our relationships with marine mammals are complex We have used them as resources and in some places this remains the case viewed them as competitors and culled them again ongoing in some localities been so captivated and intrigued by them that we have taken them into captivity for our entertainment and developed a lucrative eco tourism activity focused on them in many nations When we first envisaged this special topic we had two overarching aims Firstly we hoped to generate critical evaluation of some of our relationships with these animals Secondly we hoped to attract knowledgeable commentators and experts who might not traditionally publish in the peer reviewed literature We were also asking ourselves a question about what responsibility mankind might have to marine mammals on our rapidly changing planet The answer to the question can or should humans have responsibility for the lives of marine mammals when they are affected by our activities is in our opinion yes and the logical progression from this question is to direct research and effort to understand and optimise the actions reactions and responses that mankind may be able to take We hope that the papers in this special issue bring some illumination to a small selection of topics under this much wider topic area and prove to be informative and stimulating Dangerous Technologies Brandaan Huigen,2025-11-10

Dangerous Technologies focuses on the prevalent theft of consumer electronics in post Apartheid South Africa Through a material culture perspective it explores why these objects have commonly been targeted by bandits and subsequently circulated through the criminal underground The author traces ethnographically how devices travel between various social spheres delving into the experiences of a range of individuals from diverse residents who fall victim to criminals to the bandits who steal electronics for money or drugs the African migrants who export consignments of stolen electronics to their home countries the envious residents who buy stolen electronics and finally the police attempting to grapple with the problem Dangerous Technologies suggests that electronics have widened digital divides between citizens resulting in underground circuits that seek to violently redistribute enviable electronics to low income residents who have not been able to formally participate in electronics consumption and use Due to porous borders the widespread theft and redistribution of electronics do not only stem from internal inequalities within South African society but also from broader disparities across the African continent The book furthers knowledge about how and why particularly modern electronics have precipitated violent property crime in democratic South Africa It is relevant to scholars of social and cultural anthropology particularly those with an interest in material culture digital anthropology and economic and political anthropology as well as criminologists
