The Science of Basic L-Rod Dowsing Richard Warburton,2025-02-14 Dowsing has been a known practice for at least 500 years with some evidence suggesting it may have been used for millennia Historically dowsers used a forked Y shaped stick following the movement toward the presence of water minerals or other objects located beneath the ground Today the most common tool used is a wire bent into the shape of an L leading to the term L rod dowsing Only a few of dowsing s many forms appear to have a clear physical basis such that some physical phenomenon in the environment causes a physiological response in the body Despite the many studies performed in the past none have resulted in a comprehensive testable explanation for how dowsing works This book reviews and critiques some of the common explanations for L rod field dowsing describes an investigation into various aspects of L rod dowsing and proposes a mechanism which explains the physical observations

Building on the prior scientific studies it presents a theory based on well known scientific principles for the physical component of dowsing
