an electronic media that makes teaching easier Readers can find that this book includes Japanese writing among English text This is because I use this text for teaching in Tokyo The main aim of this book is a collection of data which is useful in understanding the state of art technology and its application to new topics Understanding the fundamental issues is important because practice makes use of many assumptions hypotheses and way of thinking It has been my policy to show reasons why practice employs those ideas by showing experimental and field backgrounds This idea does not change even today
