Cultures of Correspondence in Early Modern Britain James Daybell, Andrew Gordon, 2016-05-26 The letter is a powerfully evocative form that has gained in resonance as the habits of personal letter writing have declined in a digital age But faith in the letter as evidence of the intimate thoughts of individuals underplays the sophisticated ways letters functioned in the past In Cultures of Correspondence in Early Modern Britain leading scholars approach the letter from a variety of disciplinary perspectives to uncover the habits forms and secrets of letter writing Where material features of the letter have often been ignored by past generations fixated on the text

alone contributors to this volume examine how such elements as handwriting seals ink and the arrangement of words on the manuscript page were significant carriers of meaning alongside epistolary rhetorics The chapters here also explore the travels of the letter uncovering the many means through which correspondence reached a reader and the ways in which the delivery of letters preoccupied contemporaries At the same time they reveal how other practices such as the use of cipher and the designs of forgery threatened to subvert the surveillance and reading of letters The anxiety of early modern letter writers over the vulnerability of correspondence is testament to the deep dependence of the culture on the letter Beyond the letter as a material object *Cultures of Correspondence* sheds light on textual habits Individual chapters study the language of letter writers to reveal that what appears to be a personal and unvarnished expression of the writer's thought is in fact a deliberate skillful exercise in managing the conventions and expectations of the form If letters were a prominent and ingrained part of the cultural life of the early modern period they also enjoyed textual and archival afterlives whose stories are rarely told Too often studied only in the case of figures already celebrated for their historical or literary significance the letter in *Cultures of Correspondence* emerges as the most vital and wide ranging material textual form of the early modern period Contributors Nadine Akkerman Mark Brayshaw Christopher Burlinson James Daybell Jonathan Gibson Andrew Gordon Arnold Hunt Lynne Magnusson Michelle O Callaghan Alan Stewart Andrew Zurcher *The Ignorance Explosion* J. Lukasiewicz, 1994 The author reveals the darker side of Western society's adoption of and adaptation to modern technology Despite his portrayal of an increasingly complex artificial and dehumanized technological environment Lukasiewicz writes with humour and humanism and makes an enlightening contribution to the habitually grim literature on this subject

Shakespeare and the Evolution of the Human Umwelt Timothy Day, 2021-02-22 Shakespeare and the Evolution of the Human Umwelt brings together research on Shakespeare biosemiotics ecocriticism epigenetics and actor network theory as it explores the space between nature and narrative in an effort to understand how human bodies are stories told in the emergent language of evolution and how those bodies became storytellers themselves Chapters consider Shakespeare's plays and contemporary works such as those of Barbara Kingsolver and Margaret Atwood or productions for which Shakespeare is a genetic forebear as evolutionary artefacts which have helped to shape the human umwelt the species specific linguistic habitat that humans share in common The work investigates the juncture where semisphere meets biosphere and illuminates the role that narrative plays in our construction of the world we occupy The plays of Shakespeare as works that have had unparalleled cultural diffusion are uniquely situated to speak to the ways in which ideas and the texts they use as vehicles are always material always environmental and always alive The book discusses Shakespeare's works as vital nodes in our cultural historical moral and philosophical networks but also as environmental actors in and of themselves Plays are presented alternately as digitally encoded bits of culture awaiting their connection to an analog world or as bacteria interacting with living organisms in both productive and destructive ways altering their structure and creating new meaning through movement that is simultaneously biological and poetic This book will be of great interest to students and scholars of ecocriticism looking to model ecocritical readings and bridge gaps between scientific philosophical and literary thinking
