Monolingual Policies in Multilingual Schools Jürgen Jaspers, 2024 This book shows that teachers at monolingual schools in Brussels approach their multilingual pupils in quite ambivalent ways severely imposing the school language but also recognizing pupils multilingualism Underlining this ambivalence is important because the scientific literature typically prefers a focus on teachers who either support or suppress their pupils multilingualism Much ordinary inconsistent teacher behavior thus falls off the radar while those teachers who appear in the literature are either praised as critical or blamed as ideologically deceived This book thus explores uncharted territory it explains teachers inconsistency as a type of thinking and it suggests that we can evaluate their behavior in more complex terms than simply good or bad

Federal Equity Practice Thomas Atkins Street, 1909

Universality and Translation Gavin Arnall, Katie Chenoweth, 2025-01-07 Within contemporary theory the concepts of translation and universality have frequently been associated with different and even opposed philosophical and political projects watchwords of either domination or liberation the erasure of difference or the defense of difference The universalizing drives of capitalism colonialism and other systems of oppression have precipitated widespread suspicion of any appeal to universality This has led some in turn to champion the very notion of universality as antithetical to these systems of oppression Similarly recent scholarship has begun to grapple with the fundamental role of translation not only in forging inclusive democratic politics but also by contrast in violence including imperial expansion and global war The present volume advocates neither for nor against translation or universality

as such. Instead, it attends to their insurmountable ambiguity and equivocity, the tensions and contradictions that are internal to both concepts and that exist between them. Indeed, the wager of this volume is that translation, universality, and their relationship name irreducible yet overlapping sites of struggle for a diverse array of struggles on the Left. Drawing from multiple intellectual traditions and orientations with a special emphasis on deconstruction and Marxism, this volume both reveals and participates in a subterranean current of thought committed to theorizing the dynamic plural and ultimately inextricable relationship between translation and universality. Its contributors approach this problem in ways that challenge and unsettle dominant trends within translation studies and critical and postcolonial theory, thereby opening new lines of inquiry within and beyond these fields.

The Practice Turn in Architecture: Brussels after 1968 Isabelle Doucet, 2016-07-07

What makes a city? What makes architecture? And what is to be included in the discussions of architecture and the city? Attempting to answer such ambitious questions, this book starts from a city's specificity and complexity. In response to recent debates in architectural theory around the agency and locus of critical action, this book tests the potential of criticality through practice. Rather than through conceptual and ideological categorisations, it studies how architecture and criticality work within specific circumstances. Brussels, a complex city with a turbulent architectural and urban past, forms a compelling case for examining the tensions between urban politics, architectural imaginations, society's needs and desires, and the city's history and fabric. Inspired by pragmatist relational philosophies, this book tests the potential of criticality through practice. It studies a series of critical actions and tools which occurred in Brussels' architectural and urban culture after 1968. Weaved together, Brussels' architectural production emerges from a variety of actors, including architects, urban policy makers, activists, social workers, and citizens, but also architectural movements and ideologies, urban renewal programs, urban traumas, plans and projects, and mundane everyday practices and constructions. This book contributes to the study of Brussels and offers a timely contribution to recent scholarship on the critical reappraisal of architectural debates from the 1960s through to the 1990s. In addition, by showing how pragmatist relational philosophies can be made relevant for architectural theory, the book opens hopeful potentials for how architectural theory can better contribute to the formulation of a critical agenda for architecture.

A Forgotten Man Geoffrey Elliott, 2018-06-21

John Lodwick (1916-1959) was one of the great novelists of the early twentieth century. Yet his novels and indeed his own extraordinary life story have been virtually lost to the mists of time. Geoffrey Elliott here, for the first time, pieces together Lodwick's eventful life from his youth in Ireland to his wartime experiences in the SOE and Special Boat Service, his subsequent literary career, and his untimely death in a car crash in Spain at the age of just 43. Initially acclaimed by Somerset Maugham and Anthony Burgess soon after his death, Lodwick's novels fell out of fashion and they have largely remained out of print since. Elliott makes the case for a revival in the fortunes of this singular English novelist in a biography which sheds

new light on the early twentieth century literary scene the surrealist art world and the real life experiences of World War II

Troublesome Young Men Lynne Olson,2025-10-16 A riveting history of the daring politicians who challenged the disastrous policies of the British government on the eve of World War II On May 7 1940 the House of Commons began perhaps the most crucial debate in British parliamentary history On its outcome hung the future of Prime Minister Neville Chamberlain s government and also of Britain indeed perhaps the world Troublesome Young Men is Lynne Olson s fascinating account of how a small group of rebellious Tory MPs defied the Chamberlain government s defeatist policies that aimed to appease Europe s tyrants and eventually forced the prime minister s resignation Some historians dismiss the phony war that preceded this turning point from September 1939 when Britain and France declared war on Germany to May 1940 when Winston Churchill became prime minister as a time of waiting and inaction but Olson makes no such mistake and describes in dramatic detail the public unrest that spread through Britain then as people realized how poorly prepared the nation was to confront Hitler how their basic civil liberties were being jeopardized and also that there were intrepid politicians willing to risk political suicide to spearhead the opposition to Chamberlain Harold Macmillan Robert Boothby Leo Amery Ronald Cartland and Lord Robert Cranborne among them The political and personal dramas that played out in Parliament and in the nation as Britain faced the threat of fascism virtually on its own are extraordinary and in Olson s hands downright inspiring

Everyone's History John H. Chambers,2008-10-16 The book s structure blends history and geography A good world atlas or a world historical atlas will be helpful in the reading The historical arrangement of contents has six Parts Classical Mediaeval Early Modern Lands Early Modern Ideas Late Eighteenth and Nineteenth Centuries Twentieth Century Although this sequence of periods and categories fits Western European history best it is also reasonably appropriate for Central Asia India and China For other regions it is more arbitrary and Classical and Mediaeval periods are merged Because the Parts overlap and involve imprecise categories in the List of Contents and Summaries no attempt is made to give dates for their beginning and end
