diet subsistence agriculture settlement patterns environment and residential and ritual architecture to present the first authoritative cultural sequence for the pre contact Society Islands She also addresses a long standing debate in historical anthropology by arguing that M ohi society had multiple tiers of chiefs and settlement hierarchies prior to European contact thus forming a complex chiefdom Integrating anthropology archaeology indigenous history and theory Kahn lays out a new model for interpreting complex chiefdoms that blends bottom up and top down perspectives on social change With special attention to inequality and environmental change Fenua and Fare uses collective action theory to develop a more nuanced political history of social change offering fresh insight on the lives and interactions of commoners land managers high chiefs and secondary chiefs Readers will come away with a new appreciation for how social inequality blooms and grows not just in the Society Islands but elsewhere in Polynesia and beyond
