Water drainage

Continuous Drainage for DRY mode

- Remove the upper drain plug from back of unit.
- Attach drain connector (5/8" universal female mender) to a 3/4" hose (not included, purchase locally). Connect to spout. For models without the drain connector, just attach drain hose to spout.
- Position the open end directly over drain area.

NOTE: Make sure connection is secure to prevent leakage. Direct the hose towards the drain, making sure there are no kinks that may stop the water flow. Place the end of the hose into the drain and make sure the end of hose is down to let water flow smoothly.

When continuous drain is not used, be sure the corresponding drain plug and knob are firmly installed in

Continuous Drainage for HEAT mode (required) (Heating models only)

- Remove the lower drain plug from the back of the unit.
- Attach drain connector (5/8" universal female mender) to a 3/4" hose (not included, purchase locally). Connect to spout.
- Position the open end directly over drain area.
- The continuous drain for Heat mode has a built-in pump, maximum height for the drain hose is 5 feet.

Emptying the Water Tank

When the water in the bottom tray reaches its maximum capacity, the unit will beep 8 times and display will show "P1". At this time, the compressor will immediately stop but fan will continue to operate.

- Place a collection pan underneath the bottom tray drain spout or carefully move the unit to a drain location.
- Remove the bottom drain plug and water will begin to drain out.
- Replace the drain plug and restart unit. P1 indicator should disappear.
