

Unity of Command Vs. Unity of Direction

<i>Unity of Command</i>	<i>Unity of Direction</i>
1. It implies that a subordinate should receive orders and instructions from one boss only.	1. It means "one unit and one plan" for the group of activities having the same objective. The activities of a group should be directed towards its common goals.
2. This principle is related to the functioning of personnel.	2. This principle is related to the functioning of a department or the organisation as a whole.
3. Unity of command is necessary to fix responsibility of each subordinate.	3. Unity of direction is necessary for sound organisation.
4. Unity of command avoids conflicts in the undertaking or enterprise.	4. Unity of direction avoids duplication of efforts and wastage of resources.

sound organisation whereas unity of command is necessary to fix responsibility of the subordinates and to avoid conflicts in the enterprise.

Positive Effects :

- (i) All activities are directed towards organisational goals.
- (ii) There is better coordination throughout the organisation.

Adverse Effects of Violation :

- (i) There would be confusion in the minds of the workers.
- (ii) There would be duplication of efforts and wastage of resources.
- (iii) Lower efficiency may result because of lack of coordination.

4. Subordination of Individual Interest to General Interest. The business enterprise is superior to its individual employees. The interests of the business organisation must prevail upon the personal interests of the individuals. This principle calls for reconciliation of goals of individuals with those of the organisation. When the individual and the organisational interests conflict, the latter must prevail. The employees should subordinate their interests to the general interests of the concern. The goals of the concern must not be sacrificed for the promotion of personal interests of individuals.

For example, a worker has the goal of earning maximum wages by increasing the number of units to be produced. But in doing so he finds that there is a greater wastage of material and greater risk of breakdown of machinery. Since these are against the interests of the organisation, the worker should give preference to the interests of the organisation.

Positive Effects :

- (i) Concentration on organisational objectives.
- (ii) Alignment of organisational and individual goals.

Adverse Effects of Violation :

- (i) There might be deviation from organisational goals.

Army Diplomacy Walter M. Hudson,2015-05-19 In the immediate aftermath of World War II the United States Army became the principal agent of American foreign policy The army designed implemented and administered the occupations of the defeated Axis powers Germany and Japan as well as many other nations Generals such as Lucius Clay in Germany Douglas MacArthur in Japan Mark Clark in Austria and John Hodge in Korea presided over these territories as proconsuls At the beginning of the Cold War more than 300 million people lived under some form of U S military authority The army s influence on nation building at the time was profound but most scholarship on foreign policy during this period concentrates on diplomacy at the highest levels of civilian government rather than the armed forces governance at the local level In Army Diplomacy Hudson explains how U S Army policies in the occupied nations represented the culmination of more than a century of military doctrine Focusing on Germany Austria and Korea Hudson s analysis reveals that while the post World War II American occupations are often remembered as overwhelming successes the actual results were mixed His study draws on military sociology and institutional analysis as well as international relations theory to demonstrate how bottom up decisions not only inform but also create higher level policy As the debate over post conflict occupations continues this fascinating work offers a valuable perspective on an important yet underexplored facet of Cold War history **From Teaching To Practice: General Walter Krueger And The Development Of Joint Operations, 1921-1945** Major George B. Eaton,2015-11-06 General Walter Krueger commanded the 6th Army in the Southwest Pacific Theater in World War II As the Commander 6th Army he led the troops that liberated New Guinea and the Philippines and he was designated as the commander of the forces scheduled to invade Japan Krueger s wartime accomplishments were simply a continuation of contributions made to the United States Army and Navy over a 47 year career Yet despite his achievements after the war Krueger simply faded away Krueger s lack of historical name recognition some 50 years after his greatest achievements deprives current officers and historians not only the knowledge of wartime exploits but also of significant understanding of the development of joint operations doctrine in the years between World War I and World War II The current consensus among historians is that the United States Marine Corps was responsible for the development of amphibious operations While true at the tactical level this paper demonstrates that the Army and Naval War Colleges and the Army and Navy General Staffs and War Plans Divisions were key players in the development of doctrine at the strategic and operational level

General Walter Krueger attended both war colleges served on the faculty of both war colleges and served two tours in the Army War Plans Division including a two year stint as its Chief He was on the Joint Board or the Joint Planning Committee for over six years The intent of this paper is to show Krueger s personal influence in the development of joint doctrine The paper considers Krueger s assignment history the war plans he developed his ideas on unity of command and the need for inter service understanding and his principles of war planning It includes a case study of the Lingayen Gulf Landing in January 1945 to demonstrate the acceptance and rejection of his key ideas The paper focuses on Army and Navy issues and considers air issues only tangentially
