Haynes, 2019-07-11 This monograph investigates the International European and Commonwealth Caribbean approaches to human trafficking from an Analytical Eclectic perspective It presents a compelling empirically based argument that although there is currently a panoply of measures aimed at preventing human trafficking prosecuting offenders and protecting trafficked victims in both Europe and the Commonwealth Caribbean these measures have in practice been fraught with a number of challenges whether of a normative institutional or individual nature The continued existence of these challenges strongly suggests that there exists a disconnect between anti trafficking law and practice which is not peculiar to small island developing States since they also extend to developed States including the United Kingdom Although these challenges are not insurmountable this monograph advances the argument that sustained social economic political and legal commitments are both necessary and desirable and that without such commitments only pyrrhic victories would be won in the fight to eradicate the scourge of the twenty first century Given the importance of the issue of human trafficking and its inescapable impact on victims families communities nations regions and the international community as a whole this monograph will serve as an important resource for policy makers scholars students and practitioners actively working in this increasingly dynamic area of law Understanding Statelessness Tendayi Bloom, Katherine Tonkiss, Phillip Cole, 2017-08-04

Understanding Statelessness offers a comprehensive in depth examination of statelessness The volume presents the theoretical legal and political concept of statelessness through the work of leading critical thinkers in this area They offer a critique of the existing framework through detailed and theoretically based scrutiny of challenging contexts of statelessness in the real world and suggest ways forward The volume is divided into three parts The first Defining Statelessness features chapters exploring conceptual issues in the definition of statelessness The second Living Statelessness uses case studies of statelessness contexts from States across global regions to explore the diversity of contemporary lived realities of statelessness and to interrogate standard theoretical presentations Theorising Statelessness the final part approaches the theorisation of statelessness from a variety of theoretical perspectives building upon the earlier sections All the chapters

come together to suggest a rethinking of how we approach statelessness They raise questions and seek answers with a view to contributing to the development of a theoretical approach which can support more just policy development Throughout the volume readers are encouraged to connect theoretical concepts real world accounts and challenging analyses The result is a rich and cohesive volume which acts as both a state of the art statement on statelessness research and a call to action for future work in the field It will be of great interest to graduates and scholars of political theory human rights law and international development as well as those looking for new approaches to thinking about statelessness

International Law in the Transition to Peace Carina Lamont, 2021-11-14 This book proposes a normative framework specifically designed for the complex and legally uncertain time period between armed conflicts and peace As such it contributes both to the furthering of a jus post bellum framework and to enhanced legal clarity in complex and legally uncertain environments This in turn contributes to strengthened protection engagements and thus to improved prospects of enabling sustainable peace and security in both national and international perspectives The book offers a novel but persuasive argument for a legal framework specific for transitional environments Such legal framework it is argued is warranted in order to enable legal clarity to contemporary and outstanding legal issues as well as to furthering peace efforts in complex environments The legal framework suggested proposes a dividing line between applicable legal frameworks that it is submitted enhances both legal clarity on protection engagements and the quest for sustainable peace The framework proposed is founded on a legal analysis of the protective nature and function of law It thus provides a rare but important perspective on law that is of value in the quest for sustainable peace and security The research draws uniquely on both contemporary legal debates and on peace and conflict research It does so in order to enable legal analysis that is both legally sound as well as appropriate and adequate in today's peace and security realities The book provides a valuable resource for academics researchers and policy makers in the areas of Public International Law International Humanitarian Law International Human Rights Law the law of Peace Operations and Peace and Security Studies

The Changing Nature of Religious Rights under International Law Malcolm Evans, Peter Petkoff, Julian Rivers, 2015-03-19 The Declaration on the Elimination of All Forms of Intolerance and of Discrimination Based

on Religion or Belief as proclaimed by the United Nations General Assembly in 1981 is the only universal human rights instrument specifically focusing on religious intolerance and discrimination. However, recent years have seen increasing controversy surrounding this right in both political and legal contexts. The European Court of Human Rights has experienced a vast expansion in the number of cases it has had brought before it concerning religious freedom and politically the boundaries of the right have been much disputed. This book provides a systematic analysis of the different approaches to religious rights which exist in public international law. The book explores how particular institutional perspectives emerge in the context of these differing approaches. It examines and challenges these institutional perspectives. It identifies new directions for approaching religious rights through international law by examining existing legal tools and assesses their achievements and shortcomings. It studies religious organisations' support for international human rights protection as well as religious critique of international human rights and the development of an alternative religious Bills of Rights. It investigates whether expressions of members belonging to religious minorities can be considered under the minority right to culture rather than the right to religion and discusses the benefits and shortcomings of such a route. It analyses the reach and limits of the provisions in the 1981 Declaration, identifies ways in which the right is being eroded as a concept and suggests new ways in which the right can be reinforced and protected.

Reconceptualising the Rule of Law in Global Governance, Resources, Investment and Trade Photini Pazartzis, Maria Gavouneli, 2016-06-30. The relevance and importance of the rule of law to the international legal order cannot be doubted and was recently reaffirmed by the Declaration of the High Level Meeting of the General Assembly on the Rule of Law at the National and International Levels' solemn commitment to it on behalf of states and international organizations. In this edited collection leading scholars and practitioners from the fields of global governance, resources, investment and trade examine how the commitment to the rule of law manifests itself in the respective fields. The book looks at cutting edge issues within each field and examines the questions arising from the interplay between them. With a clear three part structure it explores each area in detail and addresses contemporary challenges while trying to assure a commitment to the rule of law. The contributions also consider how the rule of law has been or should be reconceptualised. Taking a multi disciplinary approach the book will appeal to international lawyers from across the spectrum including practitioners in the field of international investment and trade law.

Transnational Environmental Law in the Anthropocene Emily Webster, Laura Mai, 2021-03-30. Anthropocene is the proposed name for the new geological epoch in which humans have overwhelming impact on planetary processes. This edited volume invites reflection on the meaning and role of law in light of changing planetary realities. Taking the concept of the Anthropocene as a starting point the contributions to this book address emerging legal issues from a transnational environmental law perspective. How law interacts with and how law governs global environmental problems is a challenge that legal scholars have approached with vigour over the last decade. More recently the concept of the Anthropocene has become a topic that

researchers have also begun to grapple with by engaging with disciplines beyond legal scholarship One avenue of research that has emerged to address global environmental problems is transnational environmental law Adopting transnational law as a lens or framework through which to analyse environmental law takes a broader approach to the ways in which law may be assessed and deployed to meet planetary challenges The chapters within this book provide a timely intervention into the theoretical and practical approaches of transnational environmental law in a time of significant uncertainty and environmental and human crises The chapters in this book were originally published as a special issue of Transnational Legal Theory

Just Security in an Undergoverned World William Durch, Joris

Larik, Richard Ponzio, 2018-01-19 *Just Security in an Undergoverned World* examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the

earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity s very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity s future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for sharing innovating solutions and strategies for effective and essential global governance
