Briefly discuss what you are going to do in this lab, how do you achieve the goal of this lab, and what results are you expecting from this lab. **No longer than half page.**

2. Introduction Section:

Each time we start performing a new type of testing (compression, bending, ...), the report corresponding to that specific type of test should **contain theoretical background**.

It should contain separate paragraphs about each material type (ex, one paragraph for Aluminum grades, one for Steel grades, ...)

It should contain one finalizing paragraph that states what you are trying to achieve by performing the experiment.

3. Methods Section:

Include a picture of your setup/apparatus/fixtures while your sample is installed prior testing.

Instead of mentioning the dimensions, types, and number of specimens inside your text, you should **create a table** that contains all the information.

4. Results Section:

Include a **comprehensive table** (as shown on sample reports on eLearning), with appropriate units, and **significant figures** (ex, stress-strain, load-displacement, linear fitting of Young's modulus, offset lines for yield points, etc.)
