German as Contact Zone Russell West-Pavlov, 2019-09-09 This book suggests that linguistic translation is one minute province of an immense process of creative activity that constitutes the world as an ongoing dynamism of unceasing transformation Building upon the speculative quantum gravity theory which provides a narrative of the push pull dynamics of transformative translation from the very smallest scales of reality to the very greatest this book argues that the so called translative turn of the 1990s was correct in positing translation as a paradigmatic concept of transformation More radically the book stages a provocative provincialization of linguistic translation so that literary translation in particular is shown to display a remarkable awareness of its own participation in a larger creative contact zone As a result the German language literary translations in and out of German and the German language classroom can be understood respectively as quantum contact zones Russell West Pavlov is Professor of Anglophone Literatures at the University of Tbingen and Research Associate at the University of Pretoria

South African urban imaginaries: cases from Johannesburg Richard Ballard,Sandiswa Mapukata,2022-06-01 How do government officials elected politicians powerful economic actors and ordinary people think and talk about the urban geography of South Africa How do they describe and represent change that is happening in cities towns and villages Do they consider these changes to be good or bad How do they think such places should change What do they do to try to bring about the changes they desire Competing answers to these questions have been at the centre of South Africa s urban development Through the 19th and 20th centuries white minority governments straddled quite contradictory imaginaries about who could build lives for themselves in urban areas and on what terms Ordinary people held their own urban imaginaries that were quite different to those of white minority governments and were core to the fight for democracy In the democratic era a range of official and popular imaginaries offer diverse visions on how South Africans should be transformed In an earlier collection produced under the GCRO Spatial Imaginaries project we explored the sometimes contradictory nature of post apartheid urban visions with for example with some promoting the creation of new urban settlements on greenfield sites and others attempting to densify and diversify long urbanised spaces Research Report 13 South African urban imaginaries Cases

from Johannesburg is a second edited collection under the Spatial Imaginaries project and it uses a series of cases from Johannesburg that illustrate the interactions between urban imaginaries and the material city These cases include the depiction of central business districts in film as spaces of aspiration the way in which the imaginaries of developers in Hillbrow were shaped by the lives of those living there the imaginaries of Alexandra Renewal Project practitioners the way in which residents of Brixton understand diversity and the construction of two new bridges across the M1 to better connect Sandton and Alexandra

Making Public in a Privatized World David A. McDonald,2016-02-15 How do we provide effective public services in a deeply neoliberal world In the wake of the widespread failure of privatisation efforts societies in the global south are increasingly seeking progressive ways of recreating the public sector With contributors ranging from cutting edge scholars to activists working in health water and energy provision and with case studies covering a broad spectrum of localities and actors Making Public in a Privatized World uncovers the radically different ways in which public services are being reshaped from the grassroots up From communities holding the state accountable for public health in rural Guatemala to waste pickers in India and decentralized solar electricity initiatives in Africa the essays in this collection offer probing insights into the complex ways in which people are building genuine alternatives to privatization while also illustrating the challenges which communities face in creating public services which are not subordinated to the logic of the market or to the monolithic state entities of the past
