Crowdfunding and Sustainable Urban Development in Emerging Economies Benna, Umar G., Benna, Abubakar U., 2018-02-28 Economic and societal systems continually evolve as the needs and demands of society change. With the development of new technologies, research and discoveries, various opportunities emerge for venture development and developing economies. Crowdfunding and Sustainable Urban Development in Emerging Economies provides innovative research on current issues in the rise of new platforms for digital activities, a collaborative economy, crowdsourcing, crowdfunding, and other activities that are shaping developing countries. Highlighting a range of pertinent topics such as infrastructure, finance, tertiary educational institutions, and urban sustainability, this book is an important resource for academicians, practitioners, researchers, and students.

Imaging and Assessing Mobile Technology for Development Richard Musabe, John Sören Pettersson, 2024-04-08 Imaging and assessing mobile technology for development. M4D means understanding the use of appropriate technologies and services and how they directly or indirectly address socio-economic challenges. This book adopts various perspectives to identify the obstacles to affordable digital technologies in order to enable, enhance, and effect development. The book plays on the tension between success reports and optimistic projections on one hand and empirical evidence of technological belly splash on the other hand. The areas covered include infusion of service education in computing education, the Rwandan establishment of African Centres of Excellence to promote the development of appropriate technology, the metaverse's realisation in a mobile network-enabled metaversity, and difficulties detected when evaluating digitisation of distance learning, students' security awareness, dissemination of agricultural information, and mobile payment. The decolonisation of community-based media and attempts to step outside the mobile network and Internet are also covered.

Decoloniality, Language and Literacy Carolyn McKinney, Pam Christie, 2021-12-20 Through a range of unconventional genres, representations of data and dialogic reflective narratives alongside more traditional academic genres, this book engages with contexts of decoloniality and border thinking in the Global South. It addresses processes of knowledge production and participation in the highly divided and unequal schooling and higher education system in South Africa and highlights the consequences of the monolingual myth in post-colonial education, demonstrating opportunities for learning provided by translanguaging. It explores both embodied multimodal and multilingual instances of knowledge making in teaching and teacher education that take place outside but alongside formal classroom lecture and seminar modes and the positionality and learning experiences of teacher educators in science literacy and language across the curriculum. The book is not only transdisciplinary but also captures the learning that takes place beyond the borders of disciplines and formal classroom spaces.
