Yunusa-Kaltungo,2024-07-29 This book provides a comprehensive global coverage of energy management as it relates mostly to developing countries In an era of unprecedented global population growth the demand for energy has reached staggering

levels The United Nations reported an enormous 200% increase in population between 1950 and 2020 with projections indicating a further rise to 10.9 billion by 2100. As a direct consequence, global primary energy usage has surged from 3701 Mtoe in 1965 to 13511 Mtoe in 2017, putting immense strain on existing energy sources. If current growth rates persist, these sources could be depleted within a mere 130 years. To address this impending crisis, governments worldwide have implemented regulations and incentives to promote energy conservation. While numerous studies and publications have emerged within the field of energy management, there remains a significant research gap, particularly concerning the energy challenges faced by developing countries. Existing edited books on energy-related topics often narrowly focus on specific aspects, hindering readers from gaining a holistic understanding of energy management challenges and potential solutions. This book fills this void. Recognizing the pivotal role these nations play in achieving sustainable development goals, this book provides a wide-ranging perspective on the trends, challenges, and potential solutions to energy crises in these regions. It not only acknowledges the challenges faced by developing countries but also offers viable strategies to address them. The editor, leveraging his successful leadership experience in global academic endeavors, including publishing a book on Occupational Safety Health practices during the COVID-19 era and coordination of multinational research projects, is well-positioned to bring together exceptional chapters from various countries. His extensive network ensures the inclusion of diverse perspectives, enriching the book's content and offering invaluable insights to readers. Designed for a broad readership, including energy industry organizations, professionals, researchers, government bodies, policymakers, and students, this book delves into a wide array of energy management issues. By facilitating a comprehensive understanding of the subject, it equips readers with the knowledge and tools necessary to navigate the complex landscape of energy management in the modern world.

Signergy C. Jac Conradie, Ronél Johl, Marthinus Beukes, Olga Fischer, Christina Ljungberg, 2010-05-26 The title of this volume strives to capture the dynamic scope and range of the essays it contains applying insights into the workings of iconicity to texts as far removed from each other in time as the Medieval tale of a bishop fish and the war poems of 20th century Italian Futurist F T Marinetti and as thematically diverse as the Pilgrim's Progress and the poetry of e e cummings Applications reference both language and linguistics as well as literature and literary theory and related fields such as sign language and translation the former approached from the point of view of Japan Sign Language the latter with reference to translations of the Koran and the Sesotho Bible as well as modern German and English Bible translations On the language side the intricate relationships between sound symbolism and etymology and between analogy and grammaticalization are examined in depth On the literary side the iconic effects of techniques such as enjambment and metrical inversion are considered but also the ways in which an understanding of iconicity can open up meanings in complex poetry like that of the Afrikaans poet T T Cloete in this particular instance three poems inspired by figures as diverse as Dante Paul Klee and the pop icon Marilyn Monroe In view of the fact that form is able to mime meaning and meaning itself can be mimed by meaning the theoretical question is asked on the basis of a wide range of examples from literature language music and other sign systems whether meaning can also mime form An introduction to the work of H C T Mller an early scholar in the field of iconicity highlights a regrettably little known South African contribution to the development of iconicity theory
