Oilseed Cake for Nematode Management Faheem Ahmad, Rakesh Pandey, 2023-07-25 Plant parasitic nematodes (PPNs) devastate many crop plants causing billions of dollars in agricultural losses each year. Effective management methods to combat PPNs are synthetic nematicides but most are non-specific and notoriously toxic and threaten the soil ecosystem, groundwater, and human health. The plant by-products such as oilseed cakes are sources of bioactive compounds with nematocidal potential. Oilseed cakes are an excellent organic fertilizer and their bioactive compounds are now gaining importance as they are safe for the environment. This book provides the most comprehensive and up-to-date review of research on the use of oilseed cakes against PPNs. The complete knowledge of better uses of oilseed cakes for nematode management is necessary for developing effective nematode control options to reduce yield loss. Key features: Describes plant by-products such as oilseed cakes and their potential applications; Explores bioactive compounds from oilseed cakes for agricultural biofertilization and nematocidal activity; Discusses nematode management in vegetable, fruit, and legume crops; Covers the use of oilseed cakes and management of the associated challenges. This volume is designed and edited to serve as an invaluable resource text for readers associated with plant nematology, plant pathology, plant protection, and agricultural science, including researchers, teachers, advanced undergraduates, and graduate students, and even agricultural extension agents and farmers.

Biology of Composts Mukesh K. Meghvansi, Ajit Varma, 2020-04-09 This book highlights the latest findings on fundamental aspects of composting, the interaction of various microorganisms, and the underlying mechanisms. In addition to addressing modern tools and techniques used for composting research, it provides an overview of potential composting applications in both agriculture and environmental reclamation. Composting is the process of organic waste decomposition mediated by microorganisms. The end product is called compost and can be used as a supplement to improve soil fertility. As the municipal waste generated in most developing countries contains a substantial amount of organic matter suitable for composting, this technology offers a win-win opportunity for stakeholders in terms of disposing of organic waste and providing organic fertilizers for agriculture. In addition, using compost reduces the dependency on harmful chemical fertilizers and represents a sustainable and environmentally friendly alternative.

Limpopo's Legacy Anne Heffernan, 2019 Argues that the historical primacy of youth politics in Limpopo, South Africa, has influenced the production of generations of nationally prominent youth and student activists among them Julius Malema, Onkgopotse Tiro, Cyril Ramaphosa, Frank Chikane, and Peter Mokaba.

Culture, philosophies and reforms in public administration for the globalizing world Edwin O.C. Ijeoma, Ogochukwu I. Nzewi, 2018-12-31 The aim of this scholarly collected work is to contribute to the scientific discourse on public administration in a globalised environment. The book reflects on governance challenges in South Africa and in Africa, with its point of departure being the master narratives, the so-called grand debates such as New Public Management and specifically the role of technology. It also reflects on the so-called middle range

discourses concerning organisational level issues in government e.g leadership and work procedures and explores new solutions to old governance challenges like corruption and service delivery The uniqueness of this collected work lies in its ability to reflect on existing philosophies and practices in an innovative way Through its multidisciplinary lens the book opens up a new vision for the future of public administration in the South African context and on the African continent not neglecting the current local regional and global environment Until recently globalisation was considered an entrenched world order but international political events during the course of the past few years have resulted in one of the biggest challenges to its endurance in recent history This includes developments such as the successful referendum in Britain to exit the European Union highlighting the growth of a severe nationalist and protectionist agenda that may be a signal of the unravelling of the current globalism world order These developments inspire deeper interrogation of the challenges to effective public administration globally and the ripple effects in South Africa and Africa as a whole Pointedly it is evident that ensuring the voice of citizens in policy decision making remains a critical governance challenge On the policy front there are perennial challenges of land reform service delivery and poverty while on the governance front corruption has metastasised with a growing culture of impunity and lack of accountability in leadership In the midst of growing corruption and more than 20 years into democracy South Africa's income inequality remains one of the highest in the world This setting constitutes the context of the research outcome published in this scholarly work

Information, Knowledge, and Technology for Teaching and Research in Africa Dennis Ocholla, Omwoyo Bosire Onyancha, Aderonke Olaitan Adesina, 2024-08-27 This book focuses on information seeking and the knowledge economy for teaching and research in Africa The book first explores the evolution and current state of information seeking behavior research demonstrating its importance in informing practice policy and design of information systems Despite the informal sector's substantial contributions to the national economy in Uganda there is a lack of studies delving into its information needs as well as an information gap in government NGOs and other stakeholders The book proposes that an appropriate information behavior model for information poor communities such as informal entrepreneurs must be grounded on oral traditions and indigenous knowledge and should be sensitive to poverty infrastructure and illiteracy The negative impact of the lack of financial literacy skills for women entrepreneurs is investigated and solutions for this problem are suggested including regular assessments of women entrepreneurs financial literacy skills and the introduction of training courses The role of academic libraries in universities library services for students with disabilities and accessibility of library services to students with disabilities is discussed and theoretical models for enhancing service in academic libraries are presented The book highlights the specific challenges and opportunities related to information literacy for secondary schools and concludes by examining the rapid changes in library and information science research in South Africa

Enhancing Food Production System Resilience for Food Security Facing a Changing Environment Liming Ye, Ping Zhu, 2023-11-28 As the dominant source of the human food supply the global land

system underlies the foundation of the livelihood and wellbeing of humanity on Earth On the one hand the growth rate in the land system s productive capacity of food has played a key role in global food provision Technological breakthroughs in wheat and rice production during the past few decades for instance have greatly contributed to the maintenance of this growth rate in many parts of the world On the other hand however the terrestrial food production system is facing increasing challenges from environmental stressors ranging from climate change air pollution to land degradation Whether and how the global land system will support the food security of more than 10 billion people in the 21st century while minimizing its environmental footprint remains an open question to debate It is inevitable that the global food production system has to be shifted from focusing on production expansion to land system resilience so that the dual goals of sustainable production and environmental friendliness can be simultaneously achieved
