The Climate Crisis Vishwas Satgar, 2018-02-01 Essays that address the question how can people and class agency change this destructive course of history. Capitalism's addiction to fossil fuels is heating our planet at a pace and scale never before experienced. Extreme weather patterns rising sea levels and accelerating feedback loops are a commonplace feature of our lives. The number of environmental refugees is increasing and several island states and low lying countries are becoming vulnerable. Corporate induced climate change has set us on an ecocidal path of species extinction. Governments and their international platforms such as the Paris Climate Agreement deliver too little too late. Most states including South Africa continue on their carbon intensive energy paths with devastating results. Political leaders across the world are failing to provide systemic solutions to the climate crisis. This is the context in which we must ask ourselves how can people and class agency change this destructive course of history.

Volume three in the Democratic Marxism series *The Climate Crisis* investigates eco socialist alternatives that are emerging. It presents the thinking of leading climate justice activists, campaigners and social movements advancing systemic alternatives and developing bottom up just transitions to sustain life. Through a combination of theoretical and empirical work the authors collectively examine the challenges and opportunities inherent in the current moment. This volume builds on the class struggle focus of Volume 2 by placing ecological issues at the centre of democratic Marxism. Most importantly it explores ways to renew historical socialism with democratic eco socialist alternatives to meet current challenges in South Africa and the world.

Acknowledging that environmental justice transcends legal frameworks alone, the book emphasises its recognition as a social pillar integral to sustainable development. Etosha Pan to the Skeleton Coast Sian Sullivan, Ute Dieckmann, Selma Lendelvo,2024-08-02 Etosha Pan to the Skeleton Coast examines the conservation histories and concerns of one of southern Africa's most iconic conservation regions: the variously connected Etosha-Kunene areas of north-central and north-west Namibia. This cross-disciplinary volume brings together contributions from a Namibian and international group of scholars and conservation practitioners working on topics ranging from colonial histories to water management, perceptions of wildlife and the politics of belonging. Together these essays confront a critical question: how can the conservation of biodiversity-rich landscapes be reconciled with historical injustices of social exclusion and marginalisation? The book is organised in five parts: the first provides a historical backdrop for the book's detailed case studies focusing on environmental and conservation policy and legislation; the second investigates post-Independence approaches to conservation; the third focuses on Etosha-Kunene ecologies and related management issues; the fourth explores how historical circumstances shape present conservation and cultural landscapes; and the fifth addresses contemporary complexities of lion conservation and community-based natural resource management (CBNRM). By offering a comprehensive overview of evolving conservation boundaries, policies and practices in the region, this timely volume paves the way for the future design of conservation initiatives that more fully consider and integrate historical and cultural knowledge and diversity. Essential reading for conservation practitioners, policymakers and academic researchers alike, this volume also serves as a valuable resource for university students interested in conservation studies and histories of conservation.
