Higher Education - Reflections From the Field - Volume 1

,2023-11-02 COVID wrought havoc on the world's economic systems. Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems. Some institutions were prepared for the required transition to online learning. Most were not. Whether prepared or not, educators rose to the challenge. The innovativeness of educators met the challenges as digital learning replaced the face-to-face environment. In fact, some of the distance models proved so engaging that many students no longer desire a return to the face-to-face model. As with all transitions, some things were lost while others were gained. This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century. The book is organized into four sections on: The Perspectives of Higher Education; COVID as a Catalyst for Change; Embracing Online Learning as a Response to COVID; and Post-Covid: The Way Forward. It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process. These discussions shed light on the impact of the pandemic and the future of higher education post-COVID. Higher education has been forever changed, and higher education as it once was may never return. While many questions arise, the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic.

Developmentalism, Dependency, and the State: Industrial Development and Economic Change in Namibia since 1900 Christopher Hope, 2020-09-23 Why does Namibia's economy look the way it does today? Was the reliance on raw materials for exports and on the service sector for employment an inevitability? And for what reasons has the manufacturing sector, the vehicle for economic development for many now high-income countries throughout the 19th and 20th centuries, seen its growth held back? With these questions in mind, this book offers an extensive analysis of industrial development and economic change in Namibia since 1900, exploring their causes, trajectory, vicissitudes, context, and politics. Its focus is particularly on the motivations behind the economic decisions of the state, arguing that power relations both internationally and domestically have held firm a status quo that has resisted efforts towards profound economic change. This work is the first in-depth economic study covering both the colonial and independence eras of Namibia's history and provides the first history of the country's manufacturing sector.
