*Nadira: We Belong To The Earth* Nadira Omarjee, 2023-05-31 This book illustrates the ways in which the personal is political in the advancement of decolonising scholarship It explores the intimacies of coloniality entrenched in the narcissism of coloniality enabling the system through extraction subjugation and violence Pushing back against the narcissism of coloniality which is framed by the master slave dialectic or internalised oppression requires uhuru and ubuntu which are agentic strategies employed in reclaiming ontology and epistemology Uhuru insists on a decolonisation of self whereas ubuntu is determined by African radical communitarianism demanding new ways of knowing and seeing whilst re examining epistemicides of the enslaved indentured and colonised Fanonian theory is used as a framework for understanding the colonial authority's management of the colonised determining the unhappiness quintessential in the colonial condition Freirian concepts of conscientisation and criticality are used as a form of resistance disrupting the system of racial capitalism and the coloniality of gender Subsequently flipping the classroom to resist the coloniality of knowledge allows scholars to connect with community encouraging engaged scholarship from the personal political perspective making the classroom a radical space for addressing trauma and healing whilst bridging art activism and scholarship Therefore the classroom is situated against the blind spots of the banking model with male dominated decolonial work silencing the feminist perspective Consequently uhuru and ubuntu promote voice agency and resistance as a pedagogical praxis paramount for the

Diversity, Equity, and Inclusion in Astronomy Jörg Matthias Determann, 2023-11-14 Astronomy is a field concerned with matters very distant from Earth Most phenomena whether observed or theorized transcend human spaces and timescales by orders of magnitude Yet many scientists have been interested not just in the events that have occurred millennia before Earth's inception but also in their very own society here and now Since the first half of the twentieth century an increasing number of them have pursued parallel careers as both academics and activists Besides publishing peer reviewed papers they have promoted a great variety of underrepresented groups within their discipline Through conferences newsletters and social media they have sought to advance the interests of women members of racial and ethnic minorities LGBTQ and disabled people While these activists have differed in the identities they focus on they have come to share a conviction that diversity and inclusion are crucial for scientific excellence as well as social justice In this book you will read of the biographies and institutional contexts of key agents in the diversification of modern astronomy As most are recent figures whose discoveries have not been commemorated by Nobel Prizes they are relatively unknown among historians of science They have however been central to discussions about who has privileged access to the tools of astronomical inquiry including powerful telescopes and extensive databases As such they have also significantly shaped views of our universe      **Conflict and Concord** Christopher Isike, Efe Mary Isike, 2022-05-10 The book is a response to the dominant discourse of South Africa as unwelcoming to African immigrants Acknowledging the reality of xenophobia against African migrants in South Africa it explores the positive spaces of interactions between South Africans and African migrants that do not necessarily result in

tension Hence the book is about conviviality cohabitation interdependency and the production of a multicultural rainbow nation South Africa its constitution and representation as a multicultural society is the perfect context to experiment with the ideas in the book Part of the objectives is therefore to demonstrate as contained in the title the ambivalence of this relationship which the popular discourse of xenophobia has silenced Photography and History in Colonial Southern Africa Lorena Rizzo, 2019-09-16 This book studies the relationship between photography and history in colonial Southern Africa using a series of encounters with Southern African photographic archives to reflect on photography as a distinct historical form Through use of private and public archives images produced by African itinerant photographers white settlers and colonial state institutions this book explores the relationship between photography and history in colonial Southern Africa Late nineteenth century Cape Colonial prison albums police photographs from German Southwest Africa African studio portraits identity documents travel permits and passports from the 1920s and 1930s visual studies of whiteness and blackness authored by settler photographers South African dompas photographs from the 1950s and 1960s and aerial photography from the Eastern Cape in the mid twentieth century are examined to highlight the ways in which photographic images cut across conventional institutional boundaries and complicate rigid distinctions between the private and the public the political and the aesthetic the colonial and the vernacular or the subject and the object Photography and History in Colonial Southern Africa argues that rather than understanding photographs as a means of preserving and recreating the past in the present we can value them for how they evoke at once the need for and the limits of historical reconstruction This book will be of interest to students and scholars of colonial history photographic history visual media and African studies
