multi volume sets Set 1 Thermal Packaging Techniques Set 2 Thermal Packaging Tools Set 3 Thermal Packaging Applications and Set 4 Thermal Packaging Configurations provides a comprehensive one stop treatment of the techniques tools applications and configurations of electronic thermal packaging Each of the author written volumes presents the accumulated wisdom and shared perspectives of a few luminaries in the thermal management of electronics The four sets in the Encyclopedia of Thermal Packaging will provide the novice and student with a complete reference for a quick ascent on the thermal packaging learning curve the practitioner with a validated set of techniques and tools to face every challenge and researchers with a clear definition of the state of the art and emerging needs to guide their future efforts This encyclopedia will thus be of great interest to packaging engineers electronic product development engineers and product managers as well as to researchers in thermal management of electronic and photonic components and systems and most beneficial to undergraduate and graduate students studying mechanical electrical and electronic engineering Set 3 Thermal Packaging Applications The third set in the Encyclopedia includes two volumes in the planned focus on Thermal Packaging Applications and a single volume on the use of Phase Change Materials PCM a most important Thermal Management Technique not previously addressed in the Encyclopedia Set 3 opens with Heat Transfer in Avionic Equipment authored by Dr Boris Abramzon offering a comprehensive in depth treatment of compact heat exchangers and cold plates for avionics cooling as well as discussion on recent developments in these heat transfer units that are widely used in the thermal control of military and civilian airborne electronics Along with a detailed presentation of the relevant thermofluid physics and governing equations and the supporting mathematical design and optimization techniques the book offers a practical guide for thermal engineers designing avionics cooling equipment based on the author s 20 years of experience as a thermal analyst and a practical design engineer for Avionics and related systems The Set continues with Thermal Management of RF Systems which addresses sequentially the history present practice and future thermal management strategies for electronically steered RF systems in the context of the RF operational requirements as well as device module and system level electronic thermal and mechanical considerations This unique text was written by 3 authors Dr John D Albrecht Mr David H Altman Dr Joseph J Maurer with extensive US Department of Defense and aerospace industry experience in the design development and fielding of RF systems Their combined efforts have resulted in a text which is well grounded in the relevant past present and future RF systems and technologies Thus this volume will provide the designers of advanced radars and other electronic RF systems with the tools and the knowledge to address the thermal management challenges of today s technologies as well as of advanced technologies such as wide bandgap semiconductors heterogeneously integrated devices and 3D chipsets and stacks The third volume in Set 3 Phase Change Materials for Thermal Management of Electronic Components co authored by Prof Gennady Ziskind and Dr Yoram Kozak provides a detailed description of the numerical methods used in PCM analysis and a detailed explanation of the processes that accompany and characterize solid liquid

phase change in popular basic and advanced geometries These provide a foundation for an in depth exploration of specific electronics thermal management applications of Phase Change Materials This volume is anchored in the unique PCM knowledge and experience of the senior author and placed in the context of the extensive solid liquid phase change literature in such diverse fields as material science mathematical modeling experimental and numerical methods and thermofluid science and engineering Related Link s **Readers' Guide to Periodical Literature** ,1916 Author and subject index to a selected list of periodicals not included in the Readers guide and to composite books Research in Education ,1974
