

A man and a woman are shown in a close, intimate embrace. The man, who has dark hair and a beard, is leaning towards the woman, his hand gently cupping her face. The woman's face is partially visible, looking towards the man. They are both shirtless, and the woman is wearing a light-colored, possibly white, garment that is draped over her shoulders. The background is a dark, solid color, making the couple the central focus of the image.

They have no good
choices...not even
each other.

Even Darkness Sings Thomas H Cook,2018-10-02 Thomas Cook has always been drawn to dark places for the powerful emotions they evoke and for what we can learn from them These lessons are often unexpected and sometimes profoundly intimate but they are never straightforward With his wife and daughter Cook travels across the globe in search of darkness from Lourdes to Ghana from San Francisco to Verdun from the monumental mechanized horror of Auschwitz to the intimate personal grief of a shrine to dead infants in Kamukura Japan Along the way he reflects on what these sites may teach us not only about human history but about our own personal histories During the course of a lifetime of traveling to some of earth s most tragic locals from the leper colony on Molokai to ground zero at Hiroshima he finds not only darkness but a light that can illuminate the darkness within each of us Written in vivid prose this is at once a personal memoir of exploration both external and internal and a strangely heartening look at the radiance and optimism that may be found at the very heart of darkness

Mirror, Mirror Mark Pendergrast,2009-04-28 Of all human inventions the mirror is perhaps the one most closely connected to our own consciousness As our first technology for contemplation of the self the mirror is arguably as important an invention as the wheel Mirror Mirror is the fascinating story of the mirror s invention refinement and use in an astonishing range of human activities from the fantastic mirrored rooms that wealthy Romans created for their orgies to the mirror s key role in the use and understanding of light Pendergrast spins tales of the 2 500year mystery of whether Archimedes and his burning mirror really set faraway Roman ships on fire the medieval Venetian glassmakers who perfected the technique of making large flat mirrors from clear glass and for whom any attempt to leave their cloistered island was punishable by death Isaac Newton whose experiments with sunlight on mirrors once left him blinded for three days the artist David Hockney who holds controversial ideas about Renaissance artists and their use of optical devices and George Ellery Hale the manic depressive astronomer and telescope enthusiast who inspired and gave his name to the twentieth century s largest ground based telescope Like mirrors themselves Mirror Mirror is a book of endless wonder and fascination
