Unruly Places Lost Spaces Secret Cities And Other Inscrutable Geographies:

Unruly Places Alastair Bonnett, 2014-07-08 A beautiful tour of the world's hidden geographies from disappearing islands to forbidden deserts and a stunning testament to how mysterious the world remains today

Unruly Places Alastair Bonnett, 2014-07-08 This guide to weird, ruined and wonderful spots across the globe explores disappearing islands, forbidden deserts and much more, a terrific book. *Los Angeles Times*: At a time when Google Maps Street View can take you on a virtual tour of Yosemite's remotest trails, it's hard to imagine there's any uncharted ground left on the planet. But in *Unruly Places*, Alastair Bonnett rekindles our geographical imaginations with excursions into some of the world's most peculiar places, such as moving villages, secret cities, no-man's lands and floating islands. Bonnett investigates Sandy Island, a place that appeared on maps until just two years ago despite the fact that it never existed; Sealand, an abandoned gun platform off the English coast that a British citizen claimed as his own sovereign nation, issuing passports and crowning his wife as a princess; Baarle, a patchwork of Dutch and Flemish enclaves where walking from the grocery store's produce section to the meat counter can involve crossing national borders; and many other curious locales. In this delightfully quirky guide, down the road much less traveled, Bonnett reveals that the most extraordinary places on earth might be hidden in plain sight.

Sensitive Space Jason Cons, 2016-04-01 Enclaves along the India-Bangladesh border have posed conceptual and pragmatic challenges to both states since Partition in 1947. These pieces of India inside of Bangladesh and vice versa are spaces in which national security, belonging and control are shown in sharp relief. Through ethnographic and historical analysis, Jason Cons argues that these spaces are key locations for rethinking the production of territory in South Asia today. *Sensitive Space* examines the ways that these areas mark a range of anxieties over territory, land and national survival and lead us to consider why certain places emerge as contentious and often violent spaces at the margins of nation and state. Offering lessons for the study of enclaves, lines of control, restricted areas, gray spaces and other geographic anomalies, *Sensitive Space* develops frameworks for understanding the persistent confusions of land, community and belonging in border zones. It further provides ways to think past the categories of sovereignty and identity to reimagine territory in South Asia and beyond.

Handbook of Global Media Ethics Stephen J.A. Ward, 2021-09-02 This handbook is one of the first comprehensive research and teaching tools for the developing area of global media ethics. The advent of new media that is global in reach and impact has created the need for a journalism ethics that is global in principles and aims. For many scholars, teachers and journalists, the existing journalism ethics, e.g., existing codes of ethics, is too parochial and national. It fails to provide adequate normative guidance for a media that is digital, global and practiced by professional and citizen. A global media ethics is being constructed to define what responsible public journalism means for a new global media era. Currently, scholars write texts and codes for global media, teach global media ethics, analyse how global issues should be covered and gather together at conferences, round tables and meetings. However, the field lacks an authoritative handbook.

that presents the views of leading thinkers on the most important issues for global media ethics This handbook is a milestone in the field and a major contribution to media ethics *Education for Employability (Volume 2)* Joy Higgs, Will Letts, Geoffrey Crisp, 2019-08-12 We often look back at changing trends in higher education and call them bandwagons temporary fads that everyone rushes to be part of and jump on While much of the hype and jargon of The Employability Agenda may fade from the tip of our tongues or perhaps be subsumed into the norm in the mid future there are two fundamental changes that will not the digital revolution embedded in changing work and economic practices and the re globalisation of the world that this and other politico economic changes have brought about These will continue to be part of how we live and work so tertiary education will need to take its part in supporting employ ability far beyond either the timing or scope of preparation for initial employment Employability is important to local national and international labour market contexts parameters and policies As well as impacting workforces employability is an essential characteristic of workers It is very important that employability is understood and enacted as personal employability not just employment of individuals We have found that employability is defined as much if not more by mindset rather than skillset Part of this mindset involves recognising the unknowns of future work and an even bigger part is recognising our responsibilities as workers and educators lies in shaping our own employability and that of the novice learners and workers in our spaces of influence and communities of practice In *Education for Employability Volume 2 Learning for Future Possibilities* we continue on from the big agenda discussions of *Education for Employability Volume 1 The Employability Agenda* to explore education for employability in a variety of spaces in the context of higher education as an entrance into the workforce in joining communities of practice and in the lifelong pursuit of employability preparing people for a portfolio of careers rather than a job for life These two books show how educational leaders educators industry partners and thought leaders are imagining and addressing the challenges posed by the current and future changes facing our work practices and workplaces **The Arsenal of Exclusion & Inclusion**
