Circular Economy for Buildings and Infrastructure Jian Zuo, Liyin Shen, Ruidong Chang, 2024-05-03 This edited volume covers theoretical and practical aspects of circular economy in building development, offering chapters dealing with topics such as material design, affordability of housing development, waste management and recycling, smart metering, and more. A particular focus is placed on various stakeholders' points of view. The book's chapters are co-developed and

contributed by multidisciplinary teams including both academics and industry practitioners The case study oriented approach taken here helps to facilitate the reader's understanding of how building sustainability can be achieved in the context of circular economy The building industry has significant environmental social and economic impacts As one of the biggest energy consumers and carbon emitters building sustainability has attracted wide attention globally Building projects and their associated activities consume a large amount of energy natural resources and water while producing a large proportion of wastes throughout their lifecycles The traditional linear approach of make use and dispose has been heavily criticized whilst the circular approach has gained momentum Indeed circular economy has emerged as one of key principles to manage sustainability related issues by means of focusing on the circularity of resources as well as the cost implications

Urban Water Governance in Postcolonial Zimbabwe Abraham R. Matamanda, Tazviona R. Gambe, Johannes I. Bhanye, Tafadzwa C. Maramura, Oratilwe Annastacia Khoza, 2025-09-04 This book focuses on urban water supply and governance in the Global South using urban Zimbabwe as a case study to provide insights and perspectives into the realities of the water governance Applying a resilience and sustainability perspective we argue that fragmentation of responsibilities between various institutions the difficulty of coordination at various levels and the politics centered on water supply constrain effective water governance in Zimbabwe This has resulted in a downward spiral in urban water services in Zimbabwe's urban centers Additionally the innovative nature of this study is to draw from an often neglected dimension in urban water governance which is the political ecology which brings into perspective the varying interests associated with environmental contests and conflicts that influence

water allocation and sharing among urban areas by the public sector Therefore this book dwells on understanding the politics economic and ecology of water governance through an interdisciplinary lens This analysis is critical for this study because Zimbabwe s current state of obsolete water infrastructure has also had a negative impact on the supply of high quality portable water services to the public in urban areas This book will be a critical read for academic and professionals in the fields of urban geographers planners sociologists and water experts It will also be useful for undergraduate and postgraduate students from Geography Urban and regional Planning Political Science Development Studies and Economics

Disrupting Shameful Legacies Claudia Mitchell, Relebohile Moletsane, 2018-08-14 Much has been written in Canada and South Africa about sexual violence in the context of colonial legacies particularly for Indigenous girls and young women While both countries have attempted to deal with the past through Truth and Reconciliation Commissions and Canada has embarked upon its National Inquiry on Missing and Murdered Indigenous Women and Girls there remains a great deal left to do Across the two countries history legislation and the lived experiences of young people and especially girls and young women point to a deeply rooted situation of marginalization Violence on girls and women s bodies also reflects violence on the land and especially issues of dispossession What approaches and methods would make it possible for girls and young women as knowers and actors especially those who are the most marginalized to influence social policy and social change in the context of sexual violence Taken as a whole the chapters in *Disrupting Shameful Legacies Girls and Young Women Speaking Back through the Arts to Address Sexual Violence* which come out of a transnational study on sexual violence suggest a new legacy one that is based on methodologies that seek to disrupt colonial legacies by privileging speaking up and speaking back through the arts and visual practice to challenge the situation of sexual violence At the same time the fact that so many of the authors of the various chapters are themselves Indigenous young people from either Canada or South Africa also suggests a new legacy of leadership for change
