Clarence Wilson Hewlett,1912 *The Theory of Sound* John William Strutt Baron Rayleigh,1877 *The Theory of Sound* John William Strutt Baron Rayleigh,1945 *The Theory of Sound* John William Strutt Baron Rayleigh,1900 **A Text-book of Sound** Edmund Catchpool,1894 **Sound & Hearing** R. Duncan Luce,2013-10-31 The major aim of this book is to introduce the ways in which scientists approach and think about a phenomenon hearing that intersects three quite different disciplines the physics of sound sources and the propagation of sound through air and other materials the anatomy and physiology of the transformation of the physical sound into neural activity in the brain and the psychology of the perception we call hearing Physics biology and psychology each play a role in understanding how and what we hear The text evolved over the past decade in an attempt to convey something about

scientific thinking as evidenced in the domain of sounds and their perception to students whose primary focus is not science. It does so using a minimum of mathematics high school functions such as linear logarithmic sine and power without compromising scientific integrity. A significant enrichment is the availability of a compact disc CD containing over 20 examples of acoustic demonstrations referred to in the book. These demonstrations which range from echo effects and filtered noise to categorical speech perception and total more than 45 minutes are invaluable resources for making the text come alive.
