Agronomic Crops Mirza Hasanuzzaman, 2019-11-23 Agronomic crops have provided food beverages fodder fuel medicine and industrial raw materials since the beginning of human civilization More recently agronomic crops have been cultivated using scientific rather than traditional methods However in the current era of climate change agronomic crops are suffering from different environmental stresses that result in substantial yield loss To meet the food demands of the ever increasing global population new technologies and management practices are being adopted to boost yields and maintain productivity under both normal and adverse conditions Further in the context of sustainable agronomic crop production scientists are adopting new approaches such as varietal development soil management nutrient and water management and pest management Researchers have also made remarkable advances in developing stress tolerance in crops However the search for appropriate solutions for optimal production to meet the increasing food demand is still ongoing Although there are several publications on the recent advances in these areas there are few comprehensive resources available covering all of the recent topics This timely book examines all aspects of production technologies management practices and stress tolerance of agronomic crops

Geosciences and the Sustainable Development Goals Joel C. Gill, Martin Smith, 2021-04-12 Meeting the

targets of the UN Sustainable Development Goals (SDGs) requires contributions by scientists focusing on understanding, monitoring, protecting, managing and restoring the natural environment including geoscientists. This book presents the first detailed discussion on the role of the geological sciences/geosciences community in the implementation of the SDGs. Unlike traditional geosciences textbooks, it is structured according to development priorities framed in the context of the 17 SDGs. Written by international experts from a diverse range of geosciences development disciplines, it explores themes linked to both science and the professional practice of science, e.g. ethics, equity, conduct and partnerships. The book is intended for graduate and senior undergraduate students in the earth sciences as well as practicing geologists and experts from other sectors involved in sustainability initiatives.
