Matheny,2012-10-09 Military commanders turn tactics into strategic victory by means of operational art the knowledge and creative imagination commanders and staff employ in designing synchronizing and conducting battles and major operations to achieve strategic goals Until now historians of military theory have generally agreed that modern operational art developed between the first and second world wars not in the United States but in Germany and the Soviet Union whose armies were supposedly the innovators and greatest practitioners of operational art Some have even claimed that U S forces struggled in World War II because their commanders had no systematic understanding of operational art Michael R Matheny believes previous studies have not appreciated the evolution of U S military thinking at the operational level Although they may rightly point to the U S Army s failure to modernize or develop a sophisticated combined arms doctrine during the interwar years they focus too much on technology or tactical doctrine In his revealing account Matheny shows that it was at the operational level particularly in mounting joint and combined operations that senior American commanders excelled and laid a foundation for their country s victory in World War II Matheny draws on archival materials from military educational institutions planning documents and operational records of World War II campaigns Examining in detail the development of American operational art as land sea and air power matured in the twentieth century he shows that contrary to conventional wisdom U S war colleges educated and trained commanders during the interwar years specifically for the operational art they employed in World War II After 1945 in the face of nuclear warfare the American military largely abandoned operational art But since the Vietnam War U S commanders have found operational art increasingly important as they pursue modern global and expeditionary warfare requiring coordination among multiple service branches and the forces of allied countries

Western Machinery and Steel World ,1955 **All Behind You, Winston** Roger Hermiston,2016-04-07 All Behind You Winston tells the story of the most remarkable gathering of leaders in modern British history the War Ministry that saw the country through its darkest and finest hour When Winston Churchill became Prime Minister on 10 May 1940 it was not with the unanimous support of Westminster or the country For many Lord Halifax was the obvious choice to succeed Neville Chamberlain and Churchill s grasp of the Home Front appeared uncertain at best He assembled around him however a Cabinet of all the talents which would variously mobilise arm feed fund shelter evacuate heal and ultimately save Britain

Among these remarkable men and women were Churchill's rivals Lord Halifax and Sir Stafford Cripps the loyal and dogged Clement Attlee titanic egos such as Lord Beaverbrook and John Reith the popular department store owner Lord Woolton the man who kept the nation fed the propagandist and playboy Duff Cooper and many of the statesmen who would go on to build the New Jerusalem in peacetime By 1945 they had not only steered the country to victory they had also ensured Churchill's inviolable position in our national myth an outcome that had seemed far from likely five years earlier In a series of character driven chapters Roger Hermiston a former deputy editor on Radio 4's Today and the author of The Greatest Traitor tells the behind closed doors story of the key figures and key ministries delving deep into the archives to bring to life a Cabinet that was both the brain and the conscience of the nation

Operation Crossbow Allan Williams, 2013-05-30 The story of the photographic intelligence work undertaken from a country house at Medmenham Buckinghamshire is one of the great lost stories of the Second World War At its peak in 1944 almost 2 000 British and American men and women worked at the top secret Danesfield House interpreting photographs the majority stereoscopic so they could be viewed in 3D to unlock secrets of German military activity and weapons development Millions of aerial photographs were taken by Allied pilots flying unarmed modified Spitfires and Mosquitos on missions over Nazi Europe it was said that an aircraft could land the photographs be developed and initial interpretation completed within two hours marking the culmination of years of experiments in aerial intelligence techniques Their finest hour began in 1943 during the planning stages of the Allied invasion of Europe when Douglas Kendall who masterminded the interpretation work at Medmenham led the hunt for Hitler's secret weapons Operation Crossbow would grow from a handful of photographic interpreters to the creation of a hand picked team and came to involve interpreters from across the Medmenham spectrum including the team of aircraft specialists led by the redoubtable Constance Babington Smith In November that year whilst analysing photographs of Peenemunde in northern Germany they spotted a small stunted aircraft on a ramp This intelligence breakthrough linked the Nazi research station with a growing network of sites in northern France where ramps were being constructed aligned not only with London but targets throughout southern Britain Through the combined skill and dedication of the Crossbow team and the heroism of the Allied pilots throughout late 1943 and 1944 V weapon launch sites were located and through countermeasures destroyed saving hundreds of thousands of lives and changing the course of the war Operation Crossbow is a wonderful story of human endeavour and derring do told for the first time

Operation 'Torch' North Africa Jean Paul Pallud, 2019-06-30 When the western Allies decided to launch a second front in North Africa they carefully

considered the anti British feeling left in France by the ill advised attack by the Royal Navy on the French Fleet at Mers el K bir in July 1940 Consequently the operation was given an American rather than a British complexion General Eisenhower was chosen to lead a mostly American force into battle and the major Royal Navy contribution was kept as inconspicuous as possible This operation marked the first time that American troops fought against German forces during the Second World War They had a rough baptism of fire in southern Tunisia in February 1943 training equipment and leadership failed in many instances to meet the requirements of the battlefield but the US Army was quick to learn and revise army doctrines particularly with respect to the use of armor The successful campaign created thousands of seasoned soldiers of all ranks whose experience would prove decisive in subsequent campaigns The next test was only two months away the invasion of Sicily In addition Operation Torch brought the French army back into the war Most important of all the Allies had seized the initiative in the West
