Uspra Study Guide:

Psychiatric Rehabilitation Carlos W. Pratt, Kenneth J. Gill, Nora M. Barrett, Melissa M. Roberts, 2006-10-06 Psychiatric rehabilitation refers to community treatment of people with mental disorders. Community treatment has recently become far more widespread due to deinstitutionalization at government facilities. This book is an update of the first edition's discussion of types of mental disorders including etiology, symptoms, course, and outcome; types of community treatment programs; case management strategies; and vocational and educational rehabilitation. Providing a comprehensive overview of this rapidly growing field, this book is suitable both as a textbook for undergraduate and graduate courses, a training tool for mental health workers, and a reference for academic researchers studying mental health. The book is written in an easy-to-read, engaging style. Each chapter contains highlighted and defined key terms, focus questions, and key topics; a case study example; special sections on controversial issues of treatment or ethics; and other special features. New chapters on supported education and integrated dual diagnosis treatment services. Comprehensive overview of all models and approaches of psychiatric rehabilitation. Special inserts on Evidence-Based Practices. New content on Wellness and Recovery. Class exercises for each chapter. Profiles of leaders in the field. Case study examples illustrate chapter points. **The Criminalization of**

Mental Illness Risdon N. Slate, Jacqueline K. Buffington-Vollum, W. Wesley Johnson, 2013-10-03 For a myriad of reasons, the criminal justice system has become the de facto mental health system. This book explores how and why this is the case. Sensationalized cases often drive criminal justice policies that can sometimes be impulsively enacted and misguided. While there are chapters that examine competency, insanity, and inpatient and outpatient commitment, the primary focus of the book is on the bulk of encounters that clog the criminal justice system with persons with mental illnesses (pwmi). Criminal justice practitioners are often ill-equipped for dealing with pwmi in crises. However, via application of therapeutic jurisprudence principles, some agencies are better preparing their employees for such encounters and attempting to stop the inhumane and costly recycling of pwmi through the criminal justice system. Coverage runs the gamut from deinstitutionalization to specialized law enforcement responses to mental health courts to jails and prisons to discharge planning, diversion, and reentry. Also, criminal justice practitioners in their own words provide insight into and examples of the interface between the mental health and criminal justice systems. Throughout the book, the balance between maintaining public safety and preserving civil liberties is examined as the state's police power and *parens patriae* roles are considered. Reasoned, collaborative approaches for influencing and informing policies that are often driven by crises are discussed. This book also reflects more psychological underpinnings than the 1st edition, as one of the co-authors new to this edition is a forensic clinical psychologist.
