Catalano,2015-09-28 If you re a librarian charged with collecting curriculum materials and children s literature to support the Common Core State Standards then this book the only one that offers explicit advice on collection development in curriculum collections is for you While there are many publications on the Common Core for school librarians and K 12 educators no such literature exists for curriculum librarians at the post secondary level This book fills that gap standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards CCSS The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices The book begins with a primer on the CCSS and how curriculum librarians can support them Discussion of the Standards is then woven through chapters arranged by content area that share research based practices in curriculum development and instruction to guide you in curriculum selection Material types covered include games textbooks children s literature primary sources counseling and nonfiction Additional chapters cover the management of curriculum collections testing collections and instruction and reference as well as how to support and collect for special needs learners Current practices in collection development for curriculum materials librarians are also reviewed The book closes with a discussion of the future of curriculum materials **Consensus** William Hayes,2013-07-01 As we consider the

current status of educational reform it is clear that the United States lacks a clear vision as to how to improve our schools In the recent past we have been able to gain support for ideas such as the need for special education programs free and reduced lunches pre school programs and equal educational opportunities for both boys and girls While programs such as these were possible because of a national consensus our challenge today is to agree on the way to move forward Although it is most obvious in our inability to act on No Child Left Behind the failure to define a common vision is true of many other issues in the field of education Without an agreed upon vision which includes the support of those working in our schools true reform will be extremely difficult The purpose of this book is to help the reader understand our differences and to suggest a way that we can reach a consensus on education reform **Current Developments in K-12 Education** Thompson
