Sweeping away the red herrings and spurious details invented in the West between 1950 and 1970 this exhaustive volume can be offered to the public with the knowledge that it documents the true histories of some 1000 aircraft types Much of what was believed to be fact has been proven wrong in various degrees and it can confidently be claimed that no book in the history of aviation has ever contained so much new information The volume is prefixed by sections on aircraft designations engines air launched weapons and much more this really is the definitive work on Russian aircraft **Agrochemicals** Franz Mjller,2000-02-21 In the past the term agrochemicals has mainly been associated with plant protection i e synthetic chemicals used to protect plants in the fields against various pests This term was broadened by the introduction of e g plant growth regulators plant hormones closely related to herbicides and juvenile hormones related to insecticides However more recently the term agrochemicals has further broadened in the sense that it includes all synthetic chemicals used in pre planting planting growth harvest ing and storage of agricultural commodities leading to the broader term crop protection products In this current publication Agrochemicals fertilizers are also included although they are traditionally thought not to fall under the term crop protection products However the main goal to use crop protection products is to ensure the production of healthy plants and to increase their yields In this context crop protection products alone could not achieve the mentioned goal without providing the plants with the necessary nutrients Consequently in a holistic approach of crop protection fertilizers are an integral part of agrochemicals *Bibliografia Republicii Socialiste România* ,1971
