I believe that the E Symposium on Industrial and Systems Engineering (ISE) should promote an integrated learning environment for our academically rigorous programs through its academic advisory programs that provide mathematics, statistics, and computer science as additional rather than engineering subjects. Integrated concepts have led to a new paradigm beyond E/Systems Engineers where research centers have synthesized the engineering and technological changes in healthcare. I believe that ISE should foster the opportunity to expand on the knowledge I am mentioned as an "Early Career." I am excited to be able present at this meeting as part of the E Symposium on Industrial and Systems Engineering through the integration of the academic knowledge and my personal/industry experience as shown in my interdisciplinary research.
