1. The most common cause for this problem is moisture entering during a trip. As the water enters the system, it will cause the pump to run continuously. (Remember to not let the pump run for more than 10 minutes at a time.) The pump will run until the water has been removed from the system. To prevent this from occurring, the pump must be the correct size for the system. Please refer to our literature for guidelines.
2. Check your pump operation. Make sure the pump is not running continuously. If the pump is running continuously, it will cause the pump to run continuously. To prevent this from occurring, the pump must be the correct size for the system. Please refer to our literature for guidelines.
