Real World Enterprise Reports Using VB6 And VB .NET Carl Ganz,2013-11-09 Although reports are frequently overlooked in applications until the end of the development process they often represent the key selling points to management as a software application s primary value lies in its output Real World Enterprise Reports Using VB6 and VB NET discusses report writing from a developer s perspective Author Carl Ganz Jr covers programming reports using such tools as VSView Preview and ActiveReports The programmatic interface offered by Crystal Reports and the delivery of reports to handheld wireless devices are also examined *Pro Dynamic .NET 4.0 Applications* Carl Ganz,2010-03-26 As a developer you are likely painfully aware that not all features of an application can be anticipated when the software ships In order to cope with these eventualities and save yourself time and perhaps money it makes sense to write your applications in such a way that end users can be made as independent of the developers as possible Giving your users the power to make changes to the way the application operates once it has shipped gives them more control over the way the application works while reducing the frequency with which you need to redistribute application files creating a win win situation Pro Dynamic NET 4 0 Applications explains how to give users the power to create additional data entry fields validation logic and new reports without assistance from the application developer You will learn how to do this for both desktop C and WPF and web ASP applications
