

QUESTIONS - CHAPTER 17 HETEROGENOUS FIRMS

Question 17.1

Table 17.1 reports 'exporter premia'. Apparently, exporting firms in general have about 12 per cent higher value added per worker but only 3 per cent higher total factor productivity. Explain possible sources of this difference.

Question 17.2

Suppose the economic conditions in *Mirandia* are perfectly described by the Melitz model of section 17.3 and the ex ante distribution function is uniform from 0 to 5. Moreover, assume that in autarky only 80 per cent of the entrepreneurs who invest in setting up a new firm actually succeed.

17.2A What is the autarky cut-off productivity level?

17.2B What is the ex ante average productivity? What is the ex post average productivity in autarky?

The government of *Mirandia* opens up international trade possibilities with *Marconia*. As a consequence, only 60 per cent of the entrepreneurs who invest in setting up a new firm actually succeed. Of the viable firms only one-third become exporters.

17.2C What is the trade cut-off productivity level?

17.2D What is the export cut-off productivity level?

17.2E What is the ex post average productivity with trade?

17.2F What is the average productivity for exporting firms?

17.2G What do you consider the best indicator of the new source of gains from trade explained in this chapter using (a combination of) your answers to the questions above?

Question 17.3

Suppose we repeat all parts of question 17.2 with the same basic information, but this time the ex ante distribution is symmetrically bell-shaped on the support from 0 to 5. Speculate how your answers to each sub-question changes. Explain.

Socioeconomic Evaluation of Megaprojects Markku

Lehtonen, Pierre-Benoît Joly, Luis Aparicio, 2016-11-22 The governance and evaluation of megaprojects that is large scale complex high stakes infrastructure projects usually commissioned by governments and delivered through partnerships between public and private organisations is receiving increased attention However megaproject evaluation has hitherto largely adopted a linear rationalist perspective to explain the frequent failure of such projects to meet the iron triangle of performance criteria delivering on time within budget and according to specifications This approach recommends greater control and accountability to remedy megaproject pathologies Drawing on empirical examples mainly from the transport sector and radioactive waste disposal this book offers new perspectives to megaproject evaluation Comprising contributions from leading experts in project evaluation and appraisal this collection opens up new avenues by suggesting two ways of improving megaproject evaluation 1 approaches that go beyond the dominant linearrationalist notion of policy processes and

emphasise instead the objective of opening up appraisal processes in order to enhance learning and reflexivity and 2 approaches that extend evaluative criteria beyond the iron triangle to cover the various socioeconomic impacts and preconditions for project success This volume will be of great relevance to scholars and practitioners with an interest in megaprojects energy and climate policy radioactive waste management urban design and project planning and management
