How to Price Effectively Utpal Dholakia, 2017-07-13 Pricing decisions are among the most important and impactful business decisions that a manager can make. How to Price Effectively: A Guide for Managers and Entrepreneurs introduces the value pricing framework, a structured, versatile, and comprehensive method for making good pricing decisions and executing them. The framework weaves together the latest thinking from academic research, journals, proven best practices from the leading pricing experts, and ideas from other fields such as medical decision making, consumer behavior, and organizational psychology. The book discusses what a good pricing decision is, which factors you should consider when making one, the role played by each factor, costs, customer value, reference prices, and the value proposition, and how they work together, the importance of price execution, and how to evaluate the success of pricing decisions. You will also be introduced to a set of useful and straightforward tools to implement the value pricing framework and study many examples and company case studies that illustrate its nuances. The purpose of How to Price Effectively: A Guide for Managers and Entrepreneurs is to provide you with a comprehensive practical guide to making, executing, and evaluating pricing decisions.

Life Care Planning and Case Management Handbook Roger O. Weed, Debra E. Berens, 2018-09-03 Life care planning is an advanced collaborative case management specialty practice focused on assessing, evaluating, coordinating, consulting, planning for, and monitoring necessary services for individuals with complex medical care needs over their lifetime. This handbook provides a comprehensive resource for all people involved with catastrophic impairments and chronic medical care case management. The Life Care Planning and Case Management Handbook, Fourth Edition, begins by defining the roles played by each of the key team members working with the life care planner. It provides planners with insights critical to successful interactions with medical and health care-related professionals, as well as the team members they are most likely to encounter as they work to build an accurate and reliable life care plan. Next, the text offers up-to-date information on the medical conditions most frequently encountered by the life care planner. The contributors, who are recognized experts in their disciplines, also address issues in forensic settings, ethics, standards, research, and credentials. The fourth edition includes numerous chapters on general issues, as well as updated standards of practice from the International Academy of Life Care Planners (IALCP). Life Care Planning Consensus Statements and valuable step-by-step charts and checklists. Completely updated and expanded, this revised handbook now includes new chapters on multicultural considerations in life care planning, admissibility of life care plans in U.S. courts, and Canadian life care planning practice. Additionally, infused in other chapters is new information on medical coding and costing for life care planners, life care planning in non-litigated contexts, as well as research and education within life care planning.
