on the relevant studies was conducted The level of evidence extracted from the studies was graded according to the Scottish Intercollegiate Guidelines Network SIGN and were synthesized to establish the protocol for patients in the proposed setting The implementation potential of the protocol was assessed in terms of the transferability feasibility and cost benefit ratio An implementation and evaluation plan was established for comprehensive evidence based protocol development The successful implementation of the protocol will be beneficial for the patients undergoing HSCT as it may hasten their recovery shorten their hospital stay and minimize their distressing experience and suffering DOI 10 5353 th_b5088442 Subjects Stem cells Transplantation Patients Care Stomatitis Prevention Evidence-based Intervention Protocol of Using Ice Water Mouthwash in the Prevention of Stomatitis for Patients Undergoing Autologous Haematological Stem Cell Transplantation [] ,2013
